

An aerial photograph of the Akra Sorgun resort during sunset. The resort features a large, multi-story building with a curved facade and numerous balconies. A long, winding swimming pool runs alongside the building, and a large, rectangular pool is visible in the foreground. The pool areas are surrounded by lounge chairs and white umbrellas. The resort is set against a backdrop of a dense forest and distant mountains under a colorful sky.

HISTORY

1971

Founded in 1971 as Barut Hotels, we have continued our journey under the name Akra Hotels since January 1, 2023. With over 50 years of experience rooted in a rich heritage, we uphold the highest standards as we express our commitment to people, nature, history, and art.

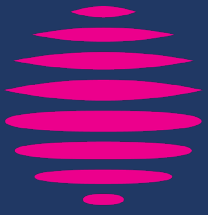

2014

Operating in the tourism sector with 2,500 employees, 1,801 rooms, and a bed capacity of 4,331, Akra Hotels introduced a new concept to Antalya by entering city hotel management for the first time in 2014 with Akra Hotel and Akra V, following its earlier investments in Kemer and Sorgun.

2015

Expanding its portfolio with Akra Fethiye TUI Blue Sensatori in 2015 and Akra Fethiye The Residence TUI Blue Sensatori in 2019, Akra Hotels offers a diverse range of accommodation options—including Pet Friendly, Bike Friendly, and Adults Only concepts—providing guests with an experience far beyond the ordinary holiday.

In addition to its hotel and accommodation services, Akra Hotels also operates in the gastronomy and entertainment sectors through venues such as Asmani Restaurant, Pablito Bistro, Başka Ol Cafe, The 251 Soul, The 251 Social Club, and the ForFun Entertainment Center.

HISTORY

Each year, Akra Hotels hosts signature events such as the Akra Jazz Festival, Meze Festival, Tour of Antalya, and Akra Gran Fondo biking races, along with cultural gatherings including interviews and book signings—bringing the people of Antalya together with prominent figures from the worlds of culture, art, and social life.

With over half a century of experience inherited from Barut Hotels, Akra Hotels continues to lead in city and resort hotel management across Antalya, Kemer, Side, and Fethiye, consistently aiming to stay 'above the competition' through exceptional service, innovative human resources practices, and outstanding gastronomy experiences.

Now operating independently from its sister brand Barut Hotels, Akra Hotels brings together 2 city hotels (Akra Hotel and Akra V) and 4 resort hotels (Akra Kemer, Akra Sorgun TUI Blue Sensatori, Akra Fethiye TUI Blue Sensatori, and Akra Fethiye The Residence TUI Blue Sensatori), contributing to Turkish tourism with international awards and high levels of guest satisfaction."

HISTORY OF AKRA SORGUN HOTELS

AKRA SORGUN began operations in 2013 in the Manavgat district of Antalya. The facility includes 336 rooms and offers a total bed capacity of 931 within a closed area of 10,435 m². Its total open area covers 74,188 m², including rent-free zones, with nearly half dedicated to green space. As a seasonal property, AKRA SORGUN operates from April to November each year.

VISION

BHM Group strives to remain an innovative and respected organization, drawing strength from its local values.

MISSION

To create value for all stakeholders through the principle of **“Happy Employee – Happy Guest.”**

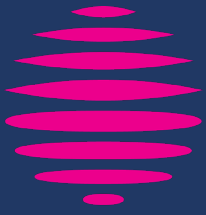

VALUES

· Fair · Reliable · Responsive

PRINCIPLES

In line with corporate governance standards, we uphold the principles of:

Fairness, Responsibility, Transparency, Accountability, Consistency, Participation & Inclusiveness, Effectiveness, and Efficiency.

MESSAGE FROM THE MANAGEMENT

Dear Guests, Valued Business Partners and Team Members,

As a brand coming from a heritage with more than half a century of experience in tourism, operating under the roof of **Akra Hotels**, **Akra Sorgun** has adopted a vision that combines high service quality not only with comfort but also with sustainable value production. Our journey, which started in 1971, was reshaped under the Akra brand as of January 1, 2023; with an understanding that embraces life as a whole, and has evolved into a transformation process by integrating nature, culture, art and respect for society into the service standards we adhere to.

On this journey, we embrace exceeding our guests' expectations, contributing to the development of our employees, and prioritizing the protection of the environment we live in as our main principles.

Akra Sorgun carries sustainability beyond being an operational necessity and has made it an inseparable part of its corporate strategy. Within this framework:

- Reuse of food and textile waste,
- Support programs for animal shelters and local ecosystems,
- Sample practices aimed at reducing plastic use,
- Investments based on renewable energy resources,
- Green area expansion and afforestation projects,
- Technology integrations ensuring energy and resource efficiency,
- Environmental and social impact evaluations with a responsible supply approach

We contribute directly to sustainable development goals through multidimensional studies such as these.

For us, sustainability is not only about environmental protection, but also about local development, ethical business practices, preserving cultural heritage, and the determination to leave a livable world for future generations.

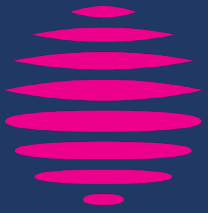

As Akra Sorgun, we believe that creating value is a responsibility that covers not only today but also the future.

For this reason, we act with an integrated management approach that takes into account both business outcomes and social and environmental impacts.

We would like to thank our valued guests, business partners, and all team members who accompany us on our transformation journey, and we wish to share together the inspiring results of our determined stance for a more livable future.

ERGIN SARP

General Manager, Akra Sorgun

INTEGRATED MANAGEMENT SYSTEM POLICY

BHM Group is committed to implementing an effective Integrated Management System across all its activities, in compliance with the requirements of ISO 9001 (Quality), ISO 22000 (Food Safety), ISO 14001 (Environment), ISO 10002 (Guest Satisfaction), ISO 45001 (Occupational Health and Safety), ISO 50001 (Energy), and Sustainability standards.

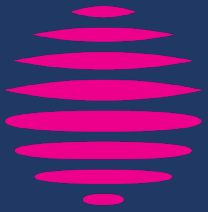

OUR POLICY

We prioritize the satisfaction of all our employees, guests, and customers, delivering our services without compromising on quality.

Our Strategic Management Approach

At BHM Group, we embrace the core principle of complying with legal requirements, applicable standards, guest and customer expectations, and our internal regulations across all product and service processes. We are committed to effectively managing risks and opportunities, setting measurable targets, and continuously improving all our operations. To support this approach, we ensure the necessary investments and employment are in place.

In all our activities, we prioritize achieving business outcomes that create value for our stakeholders and fostering long-term partnerships through a transparent and trustworthy environment.

Food Safety – Hygiene

By applying good manufacturing and hygiene practices under appropriate environmental conditions, all our facilities and brands are committed to producing healthy, delicious products that meet expectations while continuously improving and enhancing the effectiveness of the food safety management system.

Employee Safety and Investing in People

BHM Group's primary goal is to be an employer that all team members are proud to be part of, by providing a fair, safe, respectful, inclusive, and equal-opportunity work environment.

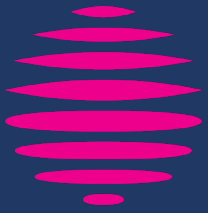

We recognize our employees as our most valuable asset. To protect the health and safety of our employees and business partners, we continuously improve our processes with active employee participation and aim to prevent occupational accidents by minimizing potential risks.

We embrace a culture of informed and responsible employees at every level, supporting their development through ongoing training programs designed to enhance their knowledge and skills.

We are firmly committed to protecting human rights and ensuring equal opportunities regardless of language, religion, race, gender, sexual orientation, marital status, age, color, ancestry, national origin, disability, or any other protected characteristic.

We also prioritize local employment, support social projects that benefit local communities, and collaborate with various institutions to strengthen our social impact.

OUR POLICY

Respect for the Environment, Protection of Cultural Heritage, Wildlife, Endemic Species and Sustainability

We strive to cultivate a corporate culture that recognizes the vital role of sustainability in our continued existence and future.

We are committed to meeting our environmental responsibilities through sustainable resource use, climate change mitigation, and the protection of biodiversity and ecosystems.

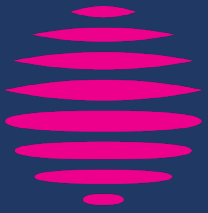

Our core objectives include preventing environmental pollution, conserving nature by using natural resources efficiently, and reducing waste at its source through recycling or safe disposal.

We conduct our operations with respect for cultural heritage, aiming to preserve, promote, and integrate areas of spiritual significance, traditions, and values into our practices. We take pride in incorporating authentic elements of both traditional and contemporary local culture into our operations, design, and culinary offerings.

We actively collaborate with NGOs and support projects focused on protecting cultural heritage, the environment, natural habitats, endemic species, and wildlife.

Through environmentally responsible procurement, we aim to reduce our carbon and water footprint by choosing products and services that consume less energy and water and generate less waste.

OUR POLICY

OUR POLICY

Energy Efficiency and Management

At BHM Group, we regard energy efficiency as one of the most critical pillars of sustainability.

Across all our facilities, we begin by measuring energy consumption to identify issues and uncover potential areas for savings.

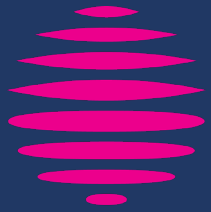

We ensure long-term improvement through automation systems and resource monitoring tools. Regular maintenance, inspections, and monitoring allow us to continuously analyze and enhance energy-saving performance.

We prioritize energy efficiency in our purchasing decisions by selecting electronic products and equipment that consume less electricity.

We actively utilize renewable energy sources, develop projects to reduce overall energy consumption, and support designs aimed at improving energy performance. In all our projects, we carefully consider factors such as technological viability, investment costs, global warming impact, and greenhouse gas emissions.

Guest Satisfaction – Guest Safety – Guest Orientation

Our guests are the foundation of our existence. Our principle is to handle guest complaints from all sources confidentially, resolve them promptly, inform guests throughout the process, and turn feedback into development opportunities by offering compensation or equivalent service when complaints are found to be valid.

Support for the Local Economy

Within the BHM Group, we support the sustainability of our suppliers by sourcing the services, products, and raw materials required for our facilities and brands from local producers and women entrepreneurs or organizations. In doing so, we contribute to the development of the region. We also help increase local employment by encouraging the creation of new business lines for the local community and monitor our local and environmental procurement rates.

Abuse and Harassment of Protected / Vulnerable Groups

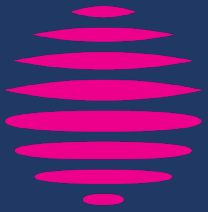

We believe that everyone has a responsibility to ensure the protection of Protected / Vulnerable Groups / People and Children.

We know that the welfare of Protected / Vulnerable Groups / People and Children and their protection from all kinds of harm, as well as from physical and emotional abuse, harassment, and exploitation, is our fundamental duty.

Our company adopts sensitivity regarding the safety and well-being of Protected / Vulnerable Groups / People and Children as a fundamental ethical principle; by implementing a **zero-tolerance policy** against all kinds of exploitation and abuse directed at Protected / Vulnerable Groups / People and Children, it considers reporting such cases to the relevant legal authorities as a corporate responsibility.

Enhancing the living comfort of our guests and employees with disabilities in our facilities and making improvements to ensure full compliance with accessibility-related legal regulations are among our main objectives.

OUR POLICY

CORPORATE RESPONSIBILITY

While carrying out its activities, Akra Hotels aims to foster positive relationships with surrounding communities, organizations, and natural habitats; to ensure that its socioeconomic impact benefits both the environment and local populations; and to minimize or eliminate any negative effects.

➤ **Being Environmentally Friendly**

Our primary goal is to carry out activities that contribute to the protection of the environment and cultural heritage in the regions where we operate and beyond, while effectively managing and minimizing our environmental impact.

➤ **Supporting the People of the Region**

We prioritize hiring staff from local communities. By doing so, we contribute to the local economy through the multiplier effect and help prevent regional migration by offering employment opportunities within the community.

➤ **Sustainable Tourism**

Our sustainability efforts focus on meeting the needs of our guests and local communities with a long-term perspective—preserving natural resources and wildlife, conserving energy and water, and enhancing overall quality of life.

➤ **Creating Opportunities**

We offer internship opportunities for tourism students to gain hands-on experience, support our employees with training and career development programs, and aim to promote from within—growing together by investing in our people.

LEGISLATION

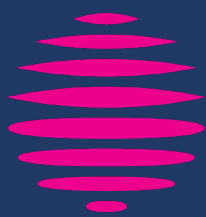

The activities of our facility are carried out in accordance with the Waste Management Regulation, Packaging Waste Control Regulation, Water Pollution Control Regulation, Technical Procedures Communiqué, Environmental Permit License Regulation, Environmental Impact Assessment Regulation, Industrial Air Pollution Control Regulation, Vegetable Waste Control Regulation, Medical Waste Control Regulation, Environmental Noise Assessment Regulation, Zero Waste Regulation, and the Regulations on Soil Pollution Control and Point Source Contaminated Sites. Accordingly, all required documents, permits, and licenses have been obtained, and sampling activities are ongoing as part of continuous environmental monitoring.

ISO 14001:2015

To systematically manage practices such as environmental purchasing policies, recycling, and energy, water, and waste management, Akra Sorgun has documented its approach through the ISO 14001 : 2015 Environmental Management System certification and operates in accordance with the requirements of the standard.

TRAVELIFE

Gold Certified for
Accommodation Sustainability

Akra Sorgun is a member of TRAVELIFE, a sustainability certification program that recognizes and encourages businesses that demonstrate high standards in corporate and social responsibility toward their employees and the local community, as well as in areas such as environmental purchasing policies, recycling, and energy, water, and waste management. Akra Sorgun has been a member of TRAVELIFE since 2013 and holds the TRAVELIFE Gold certification.

GREENKEY

Our company conducts its environmental activities in line with both local and international standards and has been a member of Green Key—an internationally recognized environmental award program—since 2015.

BLUE FLAG

Akra Sorgun has been a Blue Flag member since 2014, having implemented beach area activities in line with established criteria to certify and reinforce its commitment to environmental sustainability.

2024 SUSTAINABLE TOURISM

The Republic of Türkiye aims to utilize its tourism resources—comprising natural, cultural, and social assets—in a sustainable manner by maintaining a balance between conservation and use, ensuring their development without jeopardizing their integrity, and enhancing their recognition on an international scale. To achieve this, national sustainable tourism standards are being developed and implemented through strong collaboration with stakeholders both domestically and internationally.

🌍 At Akra Sorgun Hotel, we operate with a strong sense of environmental responsibility and aim to manage water, electricity, energy, chemical use, and solid waste in cooperation with our guests. To minimize potential harm to natural resources and the environment, we take proactive measures aligned with the principles of sustainable tourism, working collaboratively with our guests, employees, local communities, and all stakeholders.

🌍 In this context, we continuously improve our practices to reduce the consumption of natural resources, minimize harm to soil, water, and air, and enhance overall environmental sustainability. We take pride in sharing these efforts with you, our valued guests.

🌍 Together, we will continue on this path toward a more sustainable future.

WHAT WE DO

2024 BIKE-FRIENDLY HOTEL

Akra Sorgun, committed to preserving the natural beauty and historical heritage of Sorgun and Side, has pursued sustainable living practices since its establishment. With its Bike Friendly Accommodation Facility Certificate, the hotel aims to expand its environmentally conscious and sustainable hospitality policies while working to protect Antalya's history, natural environment, and cultural fabric for future generations. In response to the global climate crisis, Akra Sorgun continues to revise its consumption and service policies and take proactive steps to reduce its carbon footprint.

As of 2024, the hotel has officially incorporated Bike Friendly Hotel services into its operations, reinforcing its dedication to sustainability.

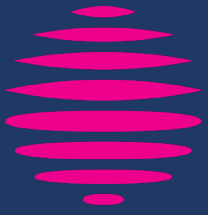

These services also cater to athlete guests participating in the Tour of Antalya and Akra Gran Fondo—two of the region's most prominent biking events sponsored by Akra Hotels.

Akra Sorgun offers a premium biking holiday experience in the Sorgun region, featuring amenities such as private bike parking, a maintenance and repair area, expert guidance on biking routes, specialized nutrition menus, 24-hour laundry access, and up-to-date weather and road information.

WHAT WE DO

OUR ENVIRONMENTAL APPROACH

Respect for Nature Is Where Global Respect Begins...

At Akra Sorgun Hotel, we strive to manage the use of water, electricity, energy, chemicals, and solid waste efficiently—without compromising guest satisfaction. Minimizing negative impacts on the environment and natural resources remains one of our top priorities, in line with the principles of sustainable tourism.

Through the implementation of environmental measures and regularly updated practices, we have reduced the consumption of natural resources, minimized harm to soil, water, and air, and, where possible, worked toward their complete elimination.

Fully aware of our responsibility to the planet, we remain committed to taking environmentally respectful actions and developing innovative solutions for a sustainable future.

WASTE MANAGEMENT

RECYCLABLE WASTE

Waste Management at Akra Hotels: A Responsible Approach to the Future

Waste management is a comprehensive process that begins with reducing waste at its source and includes sorting by type, collection, storage, recovery, transportation, disposal, and post-disposal control activities.

At Akra Hotels, our primary goal through the Waste Management System is to minimize waste generation, manage existing waste with minimal environmental impact, and ensure the recycling of all recyclable materials.

To support this effort, we engage our valued guests by distributing brochures that promote environmental awareness and by sharing information notes encouraging their participation. Through this collaboration, we continue to uphold and advance our shared commitment to sustainability principles.

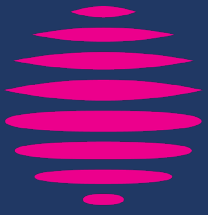

EMPLOYEE TRAININGS

WASTE MANAGEMENT

By adopting environmental sustainability as a corporate priority, our company aims to ensure that all employees are raised as environmentally conscious individuals, to promote the efficient use of resources through effective waste management practices, and to carry out comprehensive training programs, awareness activities, and practical projects in line with the zero-waste vision to minimize environmental impact across all operational processes.

A sufficient number of waste bins are placed throughout the facility to enable our guests to separate and dispose of their waste properly. We collaborate with authorized companies to ensure the recycling of separated waste, and the entire process is carefully monitored.

WASTE MANAGEMENT

To support this effort, separate bins for each waste type are provided in every department, and employees are regularly reminded of the importance of proper waste separation and recycling.

VALORIZATION OF FOOD WASTE

WASTE MANAGEMENT

In line with the principles of waste prevention and environmental sustainability, leftover bread is responsibly managed by our staff, who often take personal initiative to use it for feeding stray animals.

Food scraps collected in accordance with our commitment to social responsibility and sustainability are also directed toward meeting the nutritional needs of our animal friends at the Manavgat Municipality Animal Shelter. In **2024** alone, a total of **2,516 kg** of food waste was delivered to the shelter within an eight-month period.

OUR EFFORTS TO REDUCE WASTE

Filtered Water Dispensers

To reduce the use of PET bottles and plastic or cardboard cups at the source, filtered water dispensers and glass cups have been introduced in the staff cafeteria, main restaurant, bars, and all à la carte restaurants within our facility. Water service to our guests is provided using glass carafes.

Throughout the facility, we aim to minimize the use of single-use plastics and promote sustainable resource utilization by implementing environmentally friendly methods for water consumption. We also aim to increase the use of recyclable and reusable materials to ensure the delivery of environmentally conscious services to our guests.

Foam Soap

In line with our environmental responsibilities to reduce contaminated packaging waste, automatic foam soap dispensers have been installed in all public restrooms throughout our facility. This practice both enhances hygiene conditions and helps prevent waste generated from single-use packaging.

OUR EFFORTS TO REDUCE WASTE

Instead of single-use products, we prioritize bulk consumption products in our presentations, contributing both to the reduction of packaging waste and the prevention of food waste.

With this approach, we implement responsible consumption practices that support our sustainability goals.

By reducing the use of single-use products and minimizing packaging waste, we aim to prevent food waste through bulk consumption practices, ensure the more efficient use of resources, and promote low-impact service models that are aligned with sustainability principles.

WASTE MANAGEMENT

OUR EFFORTS TO REDUCE WASTE

Within the scope of our **Take Away** services, eco-friendly alternatives are preferred instead of foam and plastic materials that cannot be recycled. Packaging and plates made from sugarcane and biologically degradable materials are used. With this practice, environmental impacts are minimized, contributing to sustainable consumption.

In our facility, the use of plastic straws has been completely eliminated to contribute to environmental sustainability.

Paper straws are provided only upon guest request.

This practice both prevents waste and promotes eco-friendly consumption habits.

By reducing plastic straw usage and adopting environmentally friendly alternatives, we aim to decrease the amount of waste and encourage consumption habits based on environmental awareness.

OUR EFFORTS TO REDUCE WASTE

By prioritizing guest satisfaction and environmental sensitivity, the amenities offered in our rooms are selected as vegan-based products with biologically degradable packaging.

Environmentally friendly soy ink is used on the packaging.

Through the widespread use of products that contain vegan ingredients and have biodegradable packaging, we aim to strengthen the understanding of sustainable accommodation.

To reduce chemical consumption and contaminated packaging waste, environmentally friendly concentrated chemical products are prioritized in our cleaning processes.

With the **dosing system**, we aim to minimize chemical consumption and reduce contaminated packaging waste..

To support environmental sustainability and promote the use of natural resources, beach bags made from 100% raw canvas, free of dyes and chemicals, are provided for our guests. With this practice, we aim to increase the use of recyclable, chemical-free, and eco-friendly materials in the products offered for guest use.

WASTE MANAGEMENT

ENVIRONMENTALLY FRIENDLY IN-ROOM AMENITIES

WASTE MANAGEMENT

In our facility, stone paper is used for the outer packaging of amenities in line with environmentally conscious approaches.

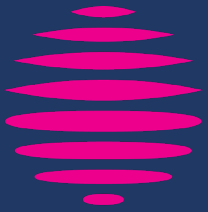

The production of stone paper does not require wood pulp, not even a single drop of water is consumed, and there is no generation of wastewater, waste gas, or waste residue.

Stone paper is eco-friendly, waterproof, moisture-proof, antibacterial, tear-resistant, and recyclable.

Laundry bags made of sustainable fabric are used.

Additionally, products offered to our guests such as toothbrushes, shoehorns, and combs are made from starch-based, biodegradable, and eco-friendly materials.

To contribute to the conservation of natural resources, we aim to increase the use of environmentally friendly materials in our amenity products and to minimize waste generation within our facility.

MANAGEMENT OF VEGETABLE WASTE OILS

To minimize the environmental impact of vegetable waste oils, our employees receive regular training and ongoing reminders to raise awareness on the issue. They are also encouraged to bring their household vegetable waste oils to the facility for proper disposal.

All vegetable waste oils collected on-site are handled in compliance with applicable regulations—stored under appropriate conditions, delivered to licensed companies, and the entire process is carefully recorded and monitored.

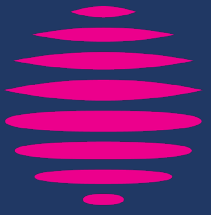

Additionally, daily inspections of the facility's oil traps are diligently conducted, and periodic cleanings are carried out without interruption.

WASTE MANAGEMENT

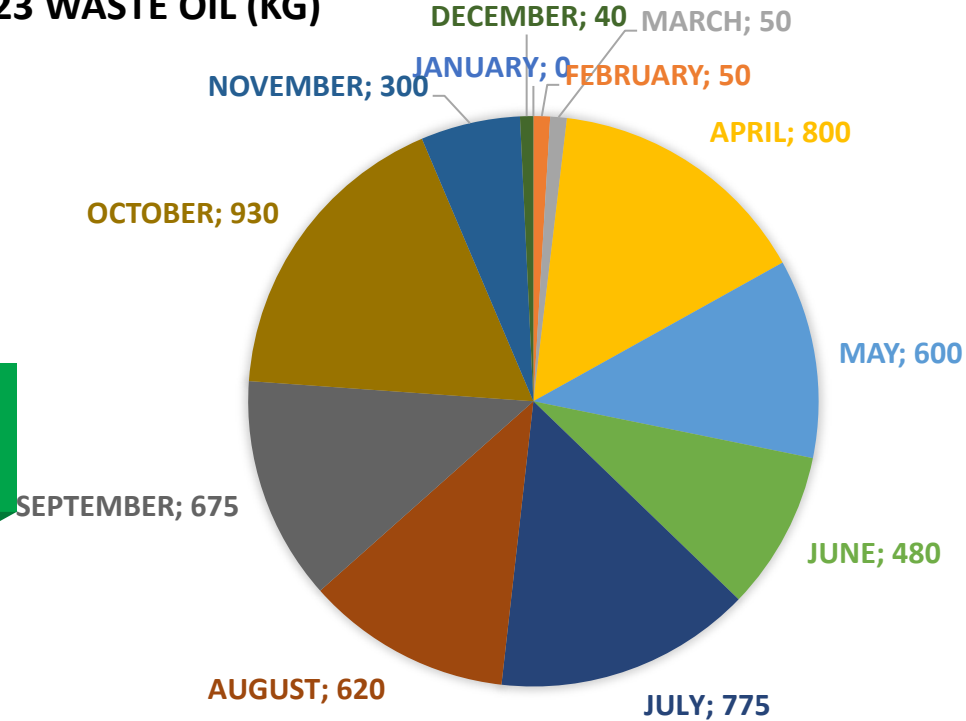

At Akra Sorgun, a total of 5,625 liters of vegetable waste oil was delivered to a licensed company for biodiesel fuel production in 2024.

From this amount, approximately 4.76 tons of biodiesel were produced, contributing to sustainable energy efforts.

WASTE
MANAGEMENT

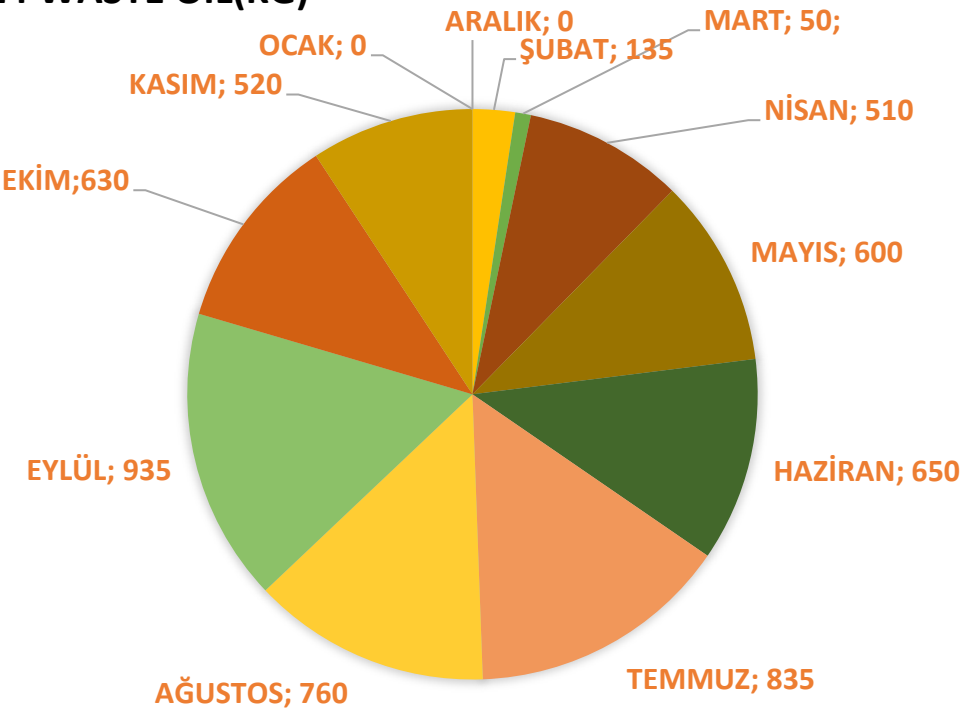

2023 WASTE OIL (KG)

Total: 5320 kg

Overnight stay 2023: 163113

2024 WASTE OIL(KG)

Total: 5625 kg

Overnight stay 2024: 180727

At Akra Sorgun, we are proud to share our recycling achievements for **2024**.

Approximately **31 tons** of paper and cardboard waste were recycled in 2024

Our Gains for 2024

- ✓ 527 trees were saved from being cut down.
- ✓ 124,000 kWh of electricity was conserved
- ✓ 108,500 liters of water were saved.
- ✓ 8,370 liters of oil were preserved.
- ✓ 75 m³ of landfill storage space was spared.

Approximately **2.7 tons** of metal waste were recovered in 2024.

Our Gains for 2024

- ✓ 34,290 kWh of electricity was conserved
- ✓ 5.4 tons of raw material use were prevented.
- ✓ 4 tons of greenhouse gas emissions were avoided.
- ✓ 2,300 liters of oil were preserved.
- ✓ 7.5 m³ of landfill storage space was spared.

Approximately **63 tons** of glass waste were recovered.

Our Gains for 2024

- ✓ 47 tons of raw materials (such as sand, soda, and limestone) were saved.
- ✓ 18,900 kWh of energy was conserved.
- ✓ 6,300 kg less carbon dioxide (CO₂) was emitted.
- ✓ 126 m³ of landfill storage space was preserved.
- ✓ The depletion of natural resources was slowed, as glass is 100% recyclable and retains its quality through repeated recycling.

Approximately **24.6 tons** of plastic waste were recovered.

Our Gains for 2024

- ✓ 36,900 liters of oil were saved.
- ✓ 61,500 kWh of energy was conserved.
- ✓ 61.5 tons of greenhouse gas (CO₂) emissions were prevented.
- ✓ 147.6 m³ of landfill storage space was preserved.
- ✓ Waste that would take centuries to decompose is recycled back into the economy.

HAZARDOUS WASTE

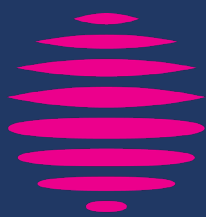

To ensure the safe disposal of hazardous waste generated in our hotels, we collect such waste from each department under proper conditions in designated hazardous waste rooms, label it accordingly, and deliver it to licensed companies for disposal or recovery in compliance with legal regulations.

In **2024**, a total of **9,083 kg** of hazardous waste from Akra Sorgun Hotel was delivered to licensed companies. We also promote awareness by training our employees on proper hazardous waste management while ensuring all waste is collected and handled responsibly.

To support environmental sustainability, waste battery collection boxes have been placed at various locations throughout our facility. To raise environmental awareness among our employees and encourage their individual contributions, regular reminders are provided during orientation training to bring used batteries from home to the facility.

In **2024**, a total of **40 kg of waste batteries** were collected and delivered to authorized institutions for safe and environmentally responsible disposal.

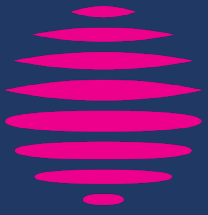

CHEMICAL USAGE

Chemical substances, while essential for various daily and operational needs, can pose significant risks to human health and the environment if not used responsibly. In our facilities, the use of chemicals—particularly in maintenance, repair, and cleaning activities—is necessary to a certain extent.

Aligned with our sustainable environmental policy, our cleaning operations aim not only to maintain hygienic conditions but also to minimize environmental impact. In this context, it is crucial to choose environmentally friendly cleaning products and to use them in proper dosages and with economic efficiency. By maintaining this awareness, we work to minimize the overall environmental impact of chemical use.

A top priority is ensuring that all chemical products are stored in clearly labeled, safe packaging that complies with relevant legislation. Material Safety Data Sheets (SDS) for all chemicals are provided in full, and every stage—from procurement to usage—is carefully monitored. Employees responsible for handling chemicals receive comprehensive training based on SDS guidelines, including correct usage, personal protective equipment requirements, and emergency response procedures for chemical spills.

CHEMICAL USAGE

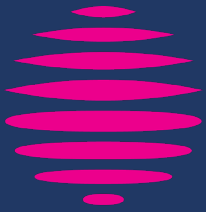

Chemical storage areas in our facilities are designed with all necessary precautions to prevent leaks, spills, and similar incidents, minimizing potential environmental risks. The storage process strictly adheres to the product type, manufacturer's technical guidelines, and relevant legal regulations. As part of our commitment to environmental awareness and emergency preparedness, employees receive regular training on "Environmental Accidents and Intervention Methods," supported by practical drills.

To ensure the safe disposal of end-of-life chemicals, we collaborate with authorized and licensed companies and closely monitor all waste management processes. Chemical usage is periodically reviewed, and training sessions are held to raise awareness among staff, helping to prevent both waste and misuse. To further reduce environmental impact, we prioritize the use of concentrated chemical products whenever possible.

Our swimming pools are equipped with automatic dosing systems, which maintain hygiene standards while minimizing chemical use.

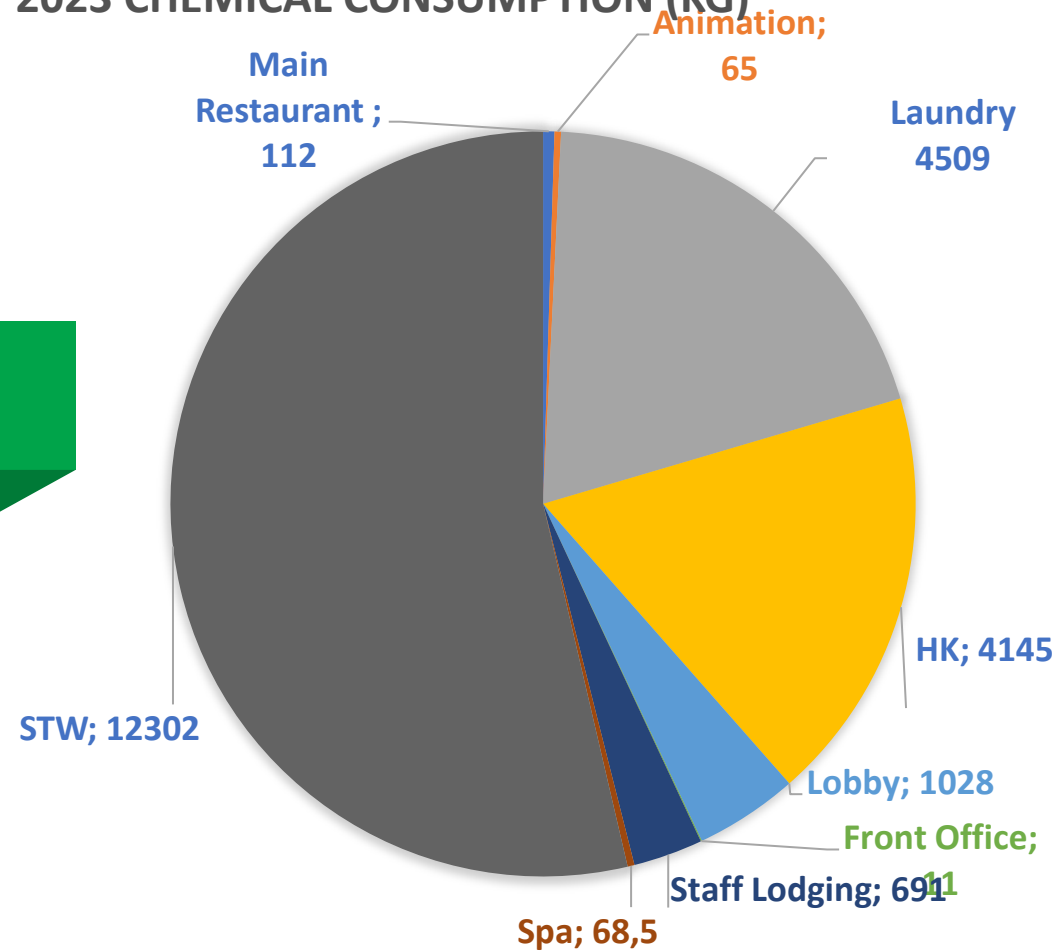

Additionally, we require our pest control service providers to use products that are safe for human health and the environment, and we promote sustainability by prioritizing eco-friendly methods such as fly catchers and adhesive traps.

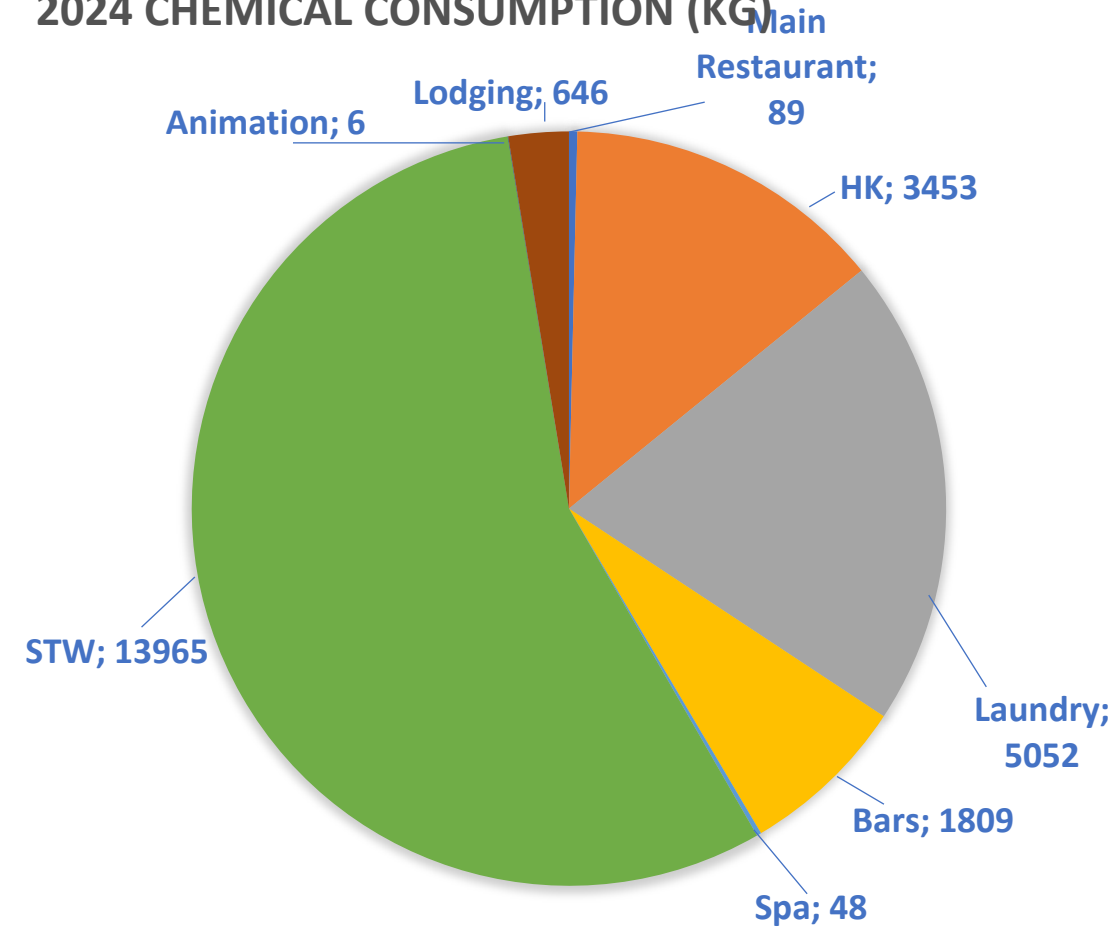

CHEMICAL USAGE

2023 CHEMICAL CONSUMPTION (KG)

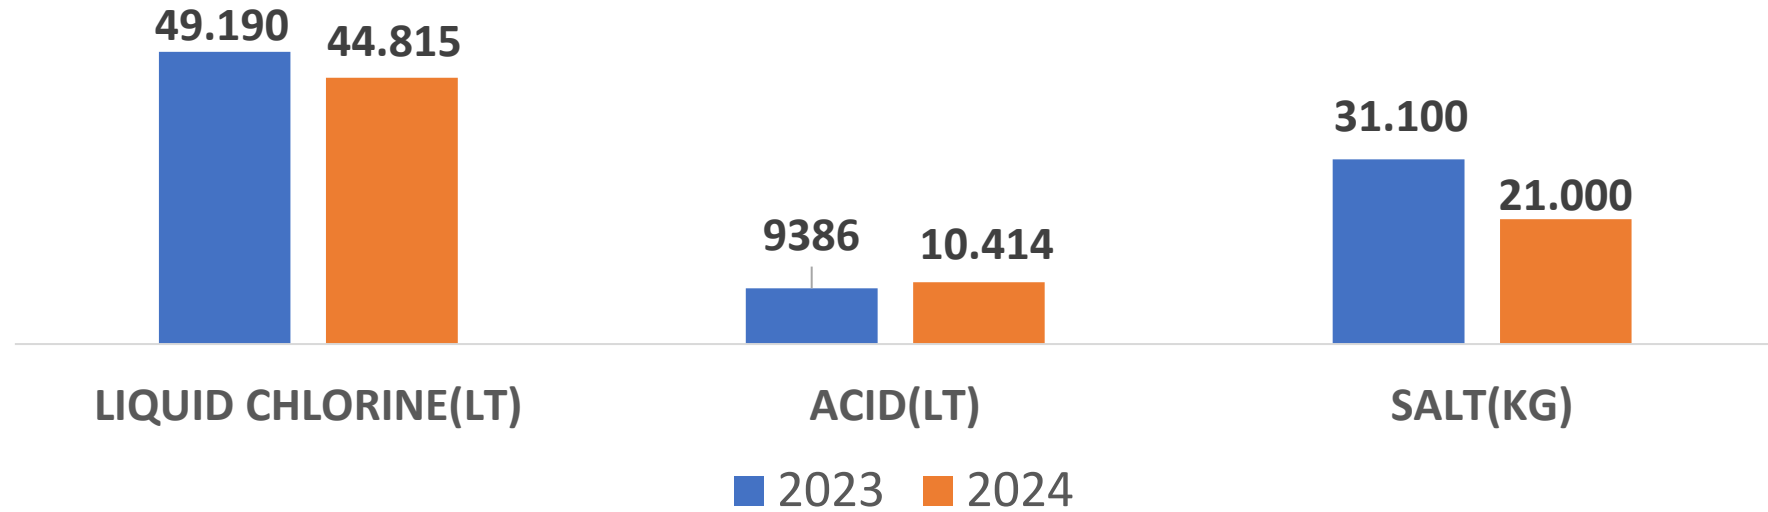

2024 CHEMICAL CONSUMPTION (KG)

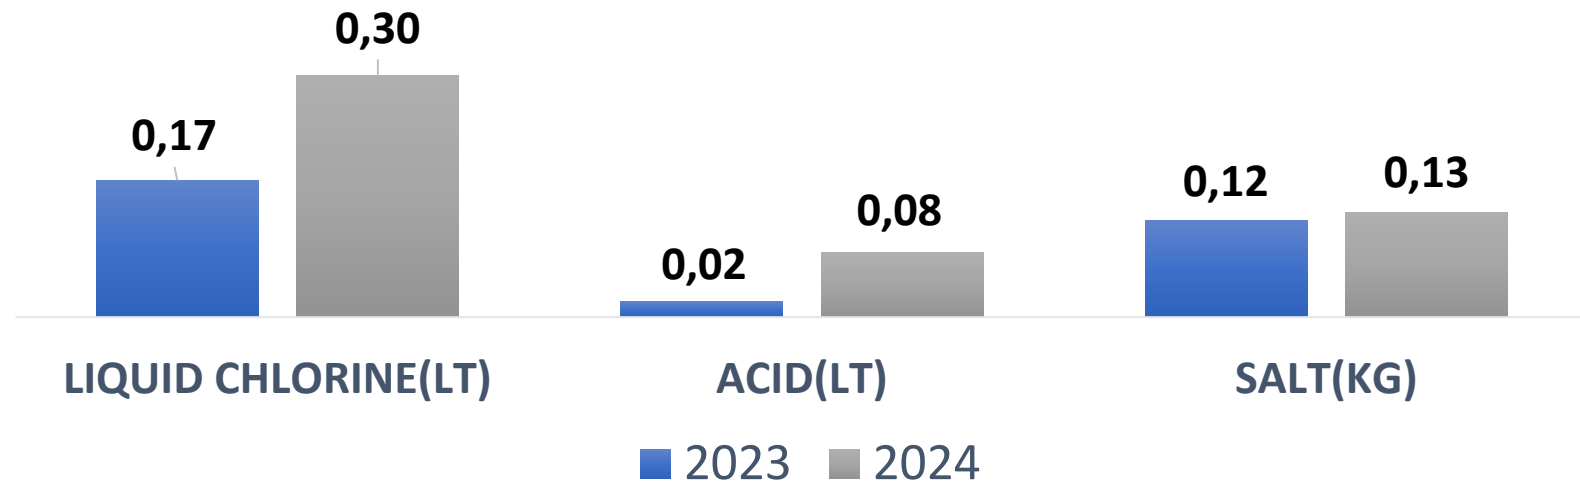

POOL CHEMICALS CONSUMPTION

Amount of Use by Year

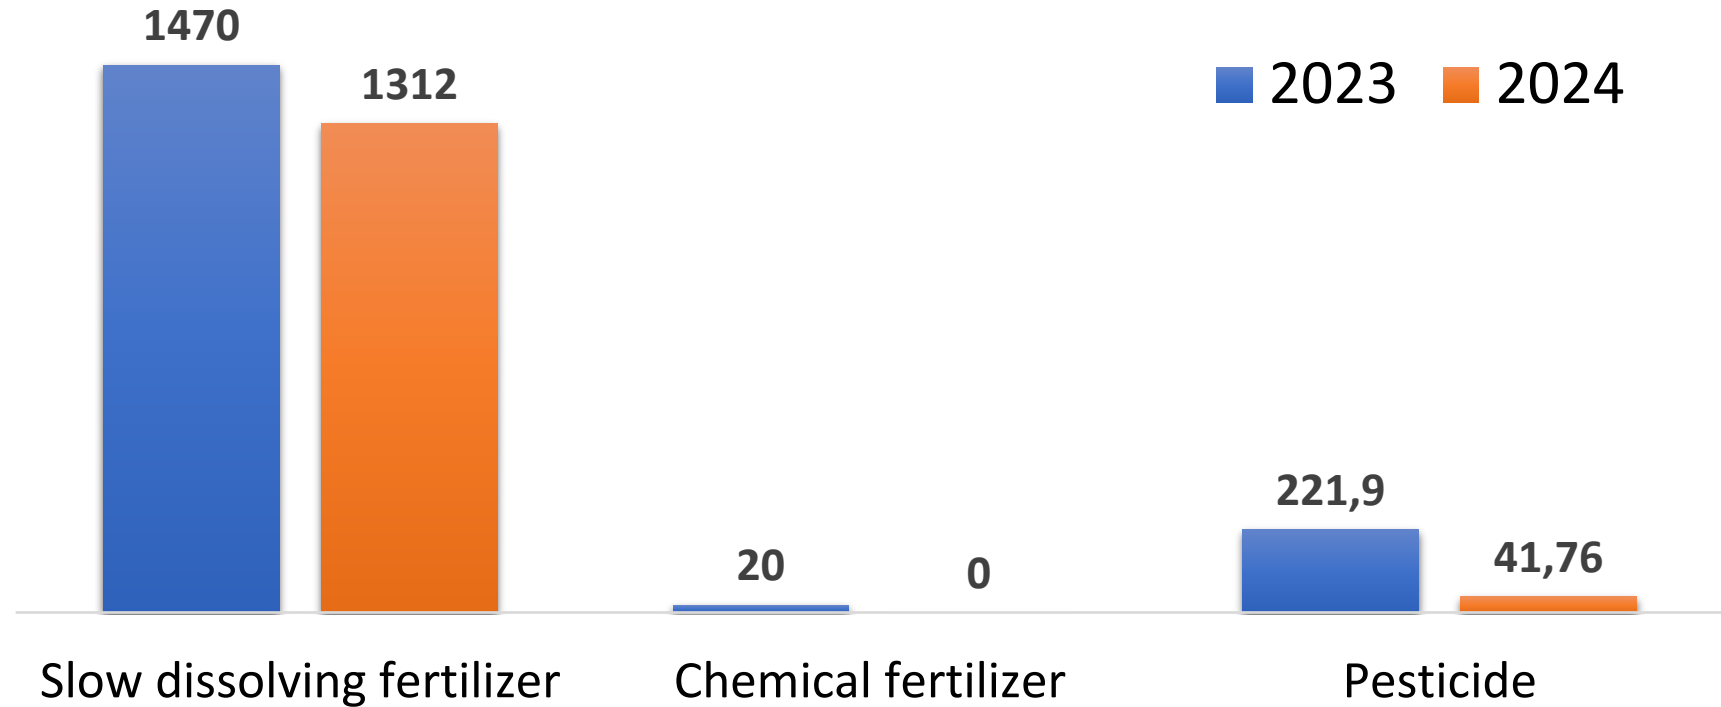

Consumption per capita

CHEMICAL
USAGE

AGRICULTURAL PESTICIDE AND FERTILIZER USE (KG)

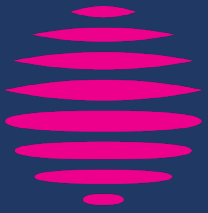

In 2024, no agricultural fertilizers were used.

AGRICULTURAL FERTILIZERS: These are fast-acting but not long-lasting. Their short-term effectiveness leads to the need for more frequent applications, increasing overall usage.

SLOW DISSOLVING FERTILIZERS: These fertilizers release nutrients gradually after being absorbed into the soil, providing longer-lasting effects. As a result, they require lower quantities and reduce the frequency of application.

PESTICIDE AND
FERTILIZER USE

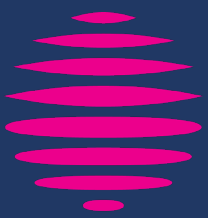

ENERGY MANAGEMENT

Ensuring energy efficiency is one of the most critical steps we take toward achieving our sustainability goals. To support this, we begin by thoroughly measuring our current energy consumption, carefully analyzing potential areas for improvement, and identifying specific applications that can deliver measurable energy savings.

Throughout the facility, priority is given to selecting equipment and systems with low energy consumption. To maintain long-term performance and efficiency, we utilize advanced automation systems and monitoring technologies that support continuous energy management. Our energy use is further optimized through regular maintenance, constant monitoring, and data-driven management practices that promote sustainable savings.

In line with this vision, the **ISO 50001 Energy Management System** was successfully implemented in our facility in 2023. This system enables the continuous improvement of our energy performance while advancing our goals to reduce environmental impact.

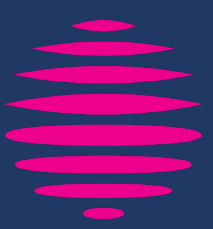

ENERGY MANAGEMENT

At Akra Sorgun, we aim to control the use of electricity, energy, chemicals, and solid waste, striving to minimize environmental and natural resource impact—without compromising guest comfort.

Through the measures implemented in line with sustainable tourism principles, Akra Sorgun has successfully reduced the use of natural resources and updated operational practices to minimize—and, where possible, eliminate—harm to soil, water, and air.

-  Heat pumps have been introduced as an alternative to solar panels, contributing to gas savings, even if partially.
-  Pool temperature values are actively monitored to prevent overheating and reduce unnecessary gas consumption.
-  The operating hours of cooling units across building blocks are optimized based on actual need, resulting in energy savings.
-  Approximately 95% of our lighting systems use Compact Fluorescent or LED bulbs for greater energy efficiency.
-  Double-glazed windows are installed in both rooms and common areas to enhance thermal insulation.
-  All minibars and televisions in guest rooms are selected for their low energy consumption features.

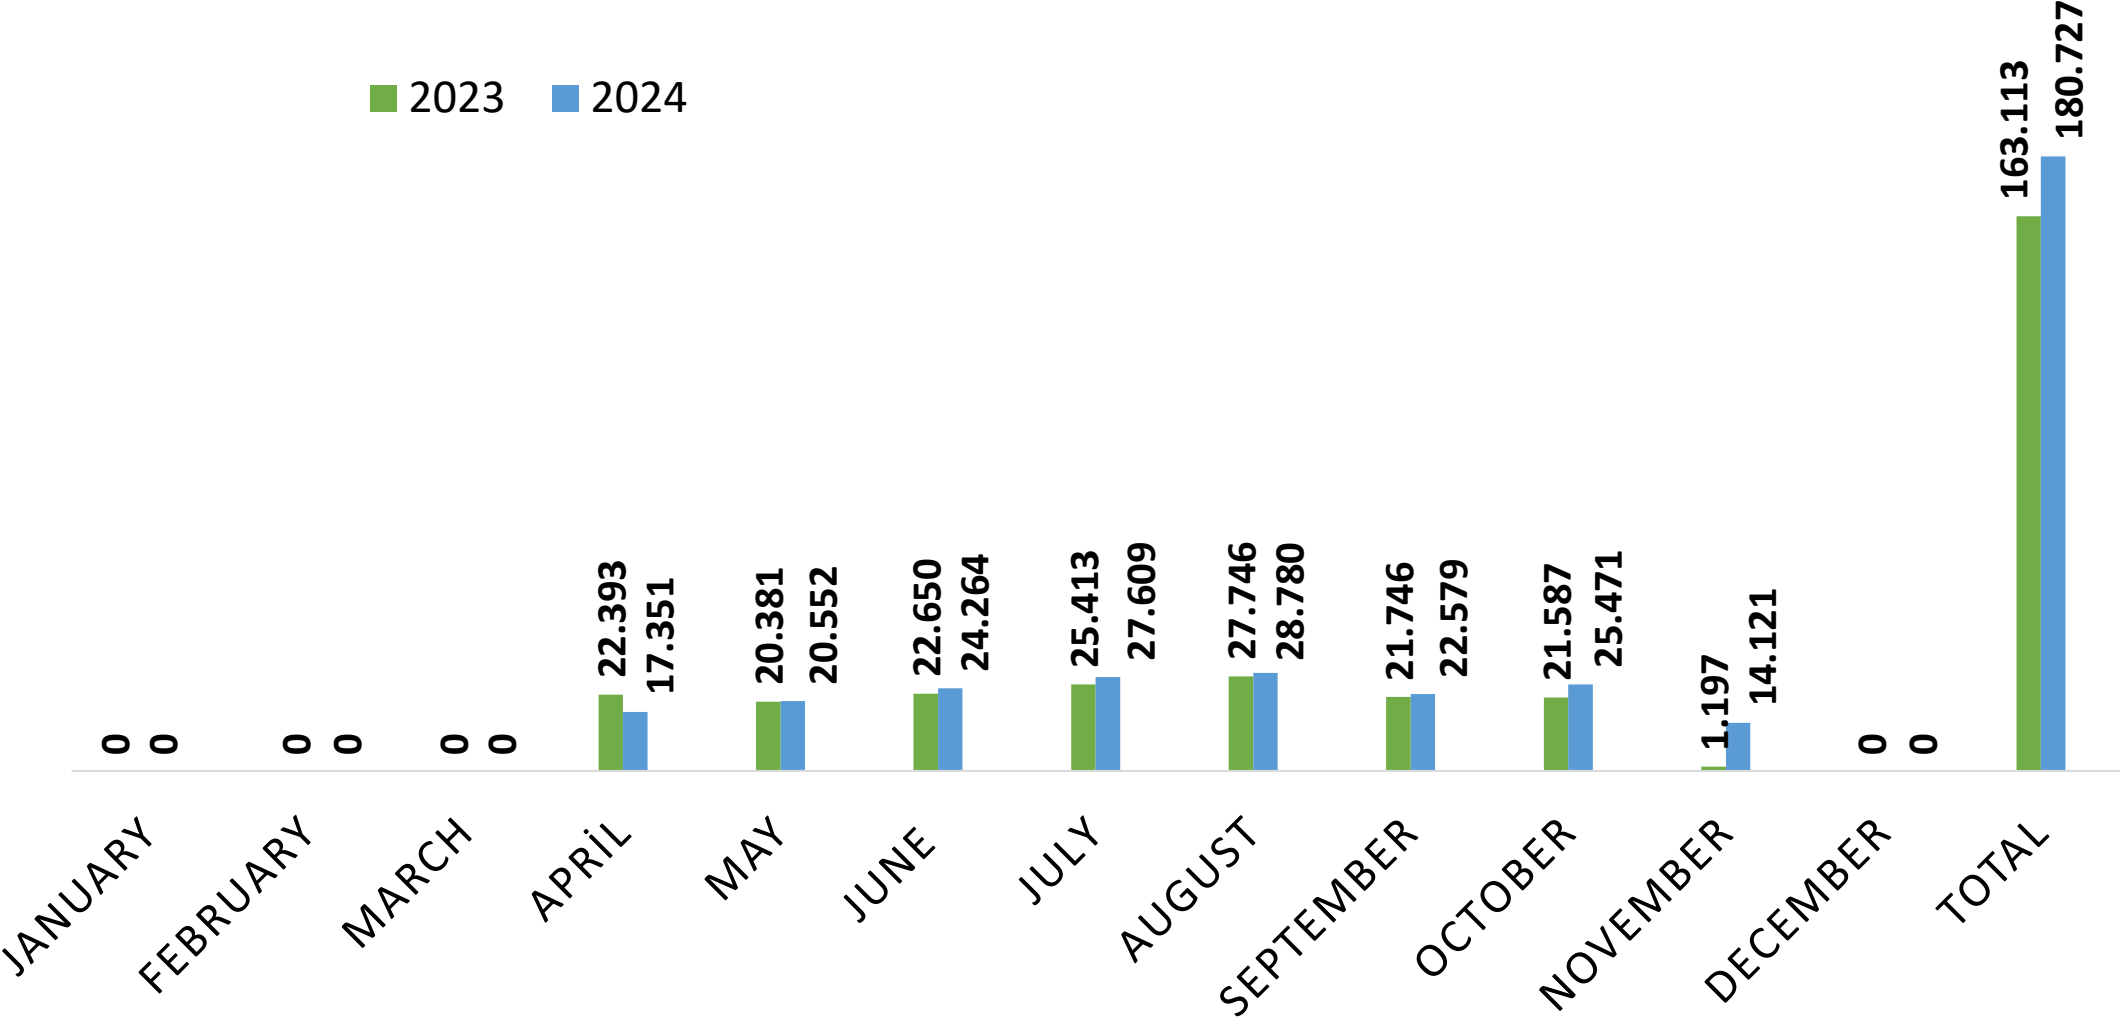

ENERGY MANAGEMENT

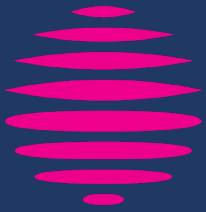

- 🌱 Minibars in guest rooms are positioned away from direct sunlight to prevent unnecessary heating and improve energy efficiency.
- 🌱 Low-energy (A+) devices are used in cooling units, helping to reduce our carbon footprint.
- 🌱 A central UPS system has been implemented to reduce battery usage.
- 🌱 Seals and gaskets of cold storage units, freezers, ice machines, and ovens are regularly inspected to maintain efficiency.
- 🌱 Convectional cookers are preferred over traditional models to enhance energy savings during food preparation.
- 🌱 Electricity consumption is reduced through the use of frequency inverters in heating system pumps, booster pumps, and main air handling units.
- 🌱 With the implementation of a smart room automation system, we have achieved minimal energy use without compromising guest comfort, contributing to our sustainability goals. Motion and presence sensors installed in guest rooms contribute significantly to energy savings. Motion sensors detect movement and keep the lighting and air conditioning systems active for a preset duration as long as motion continues. Presence sensors, on the other hand, assess ambient lighting after initial activation and automatically switch off connected lighting if natural light is sufficient, even if movement persists within the detection area.

AKRA SORGUN 2023-2024 OVERNIGHT STAY DATA

2023 2024

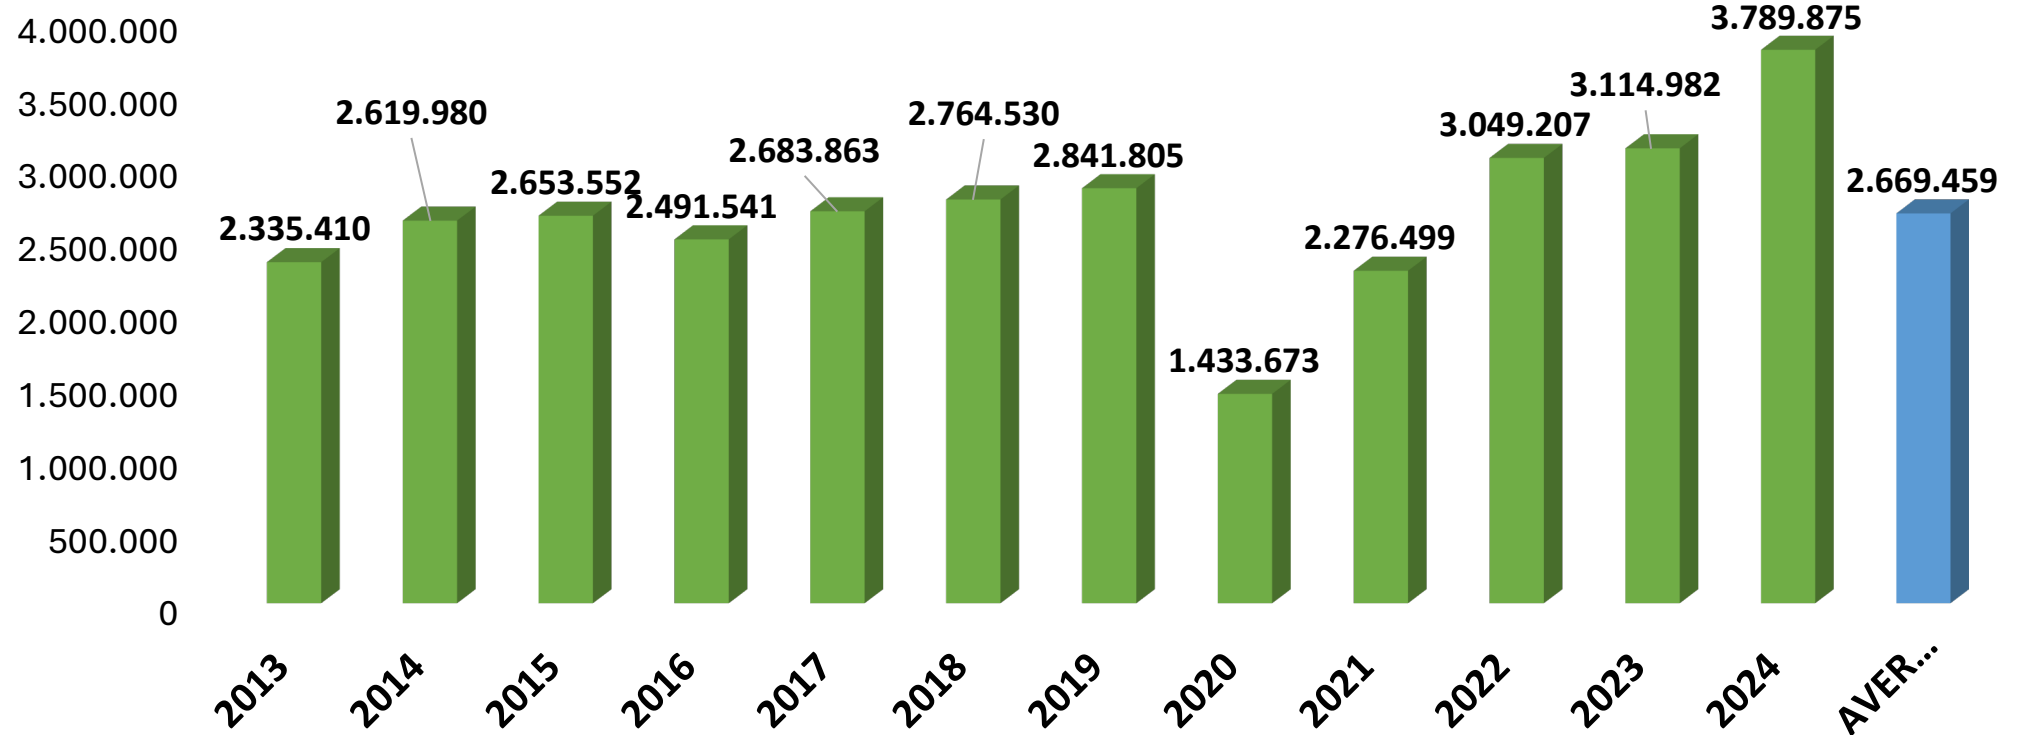

ENERGY
MANAGEMENT

AKRA SORGUN ELECTRICITY CONSUMPTION DATA

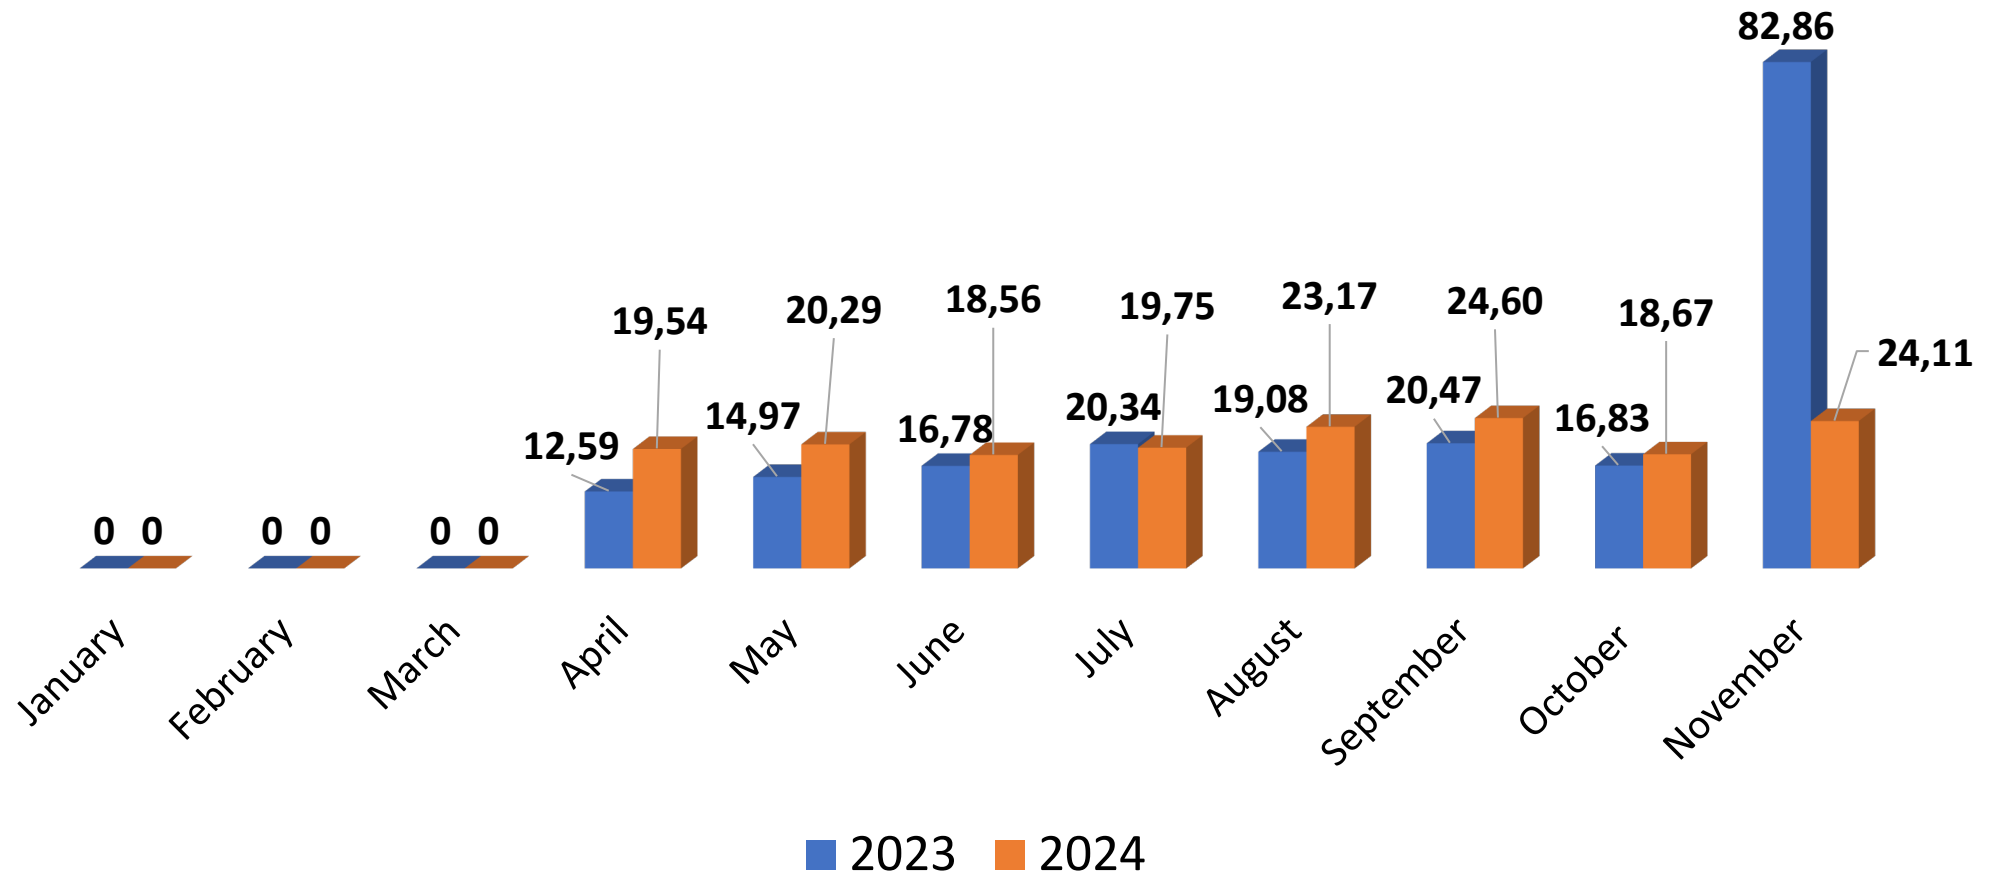

Between 2021 and 2023, a rapid recovery led to a sharp rise in consumption, peaking in 2023. This increase can be attributed to the post-pandemic tourism boom, a growing customer base, and an expanded range of services. Additionally, shifts in energy consumption habits—such as increased cleaning, ventilation, and heating/cooling—have played a significant role in this upward trend.

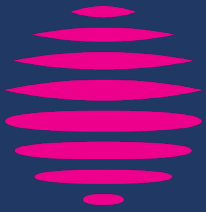

Electricity Consumption by Year (kWh)

2023 - 2024 ELECTRICITY CONSUMPTION DATA PER CAPITA (kWh)

ENERGY
MANAGEMENT

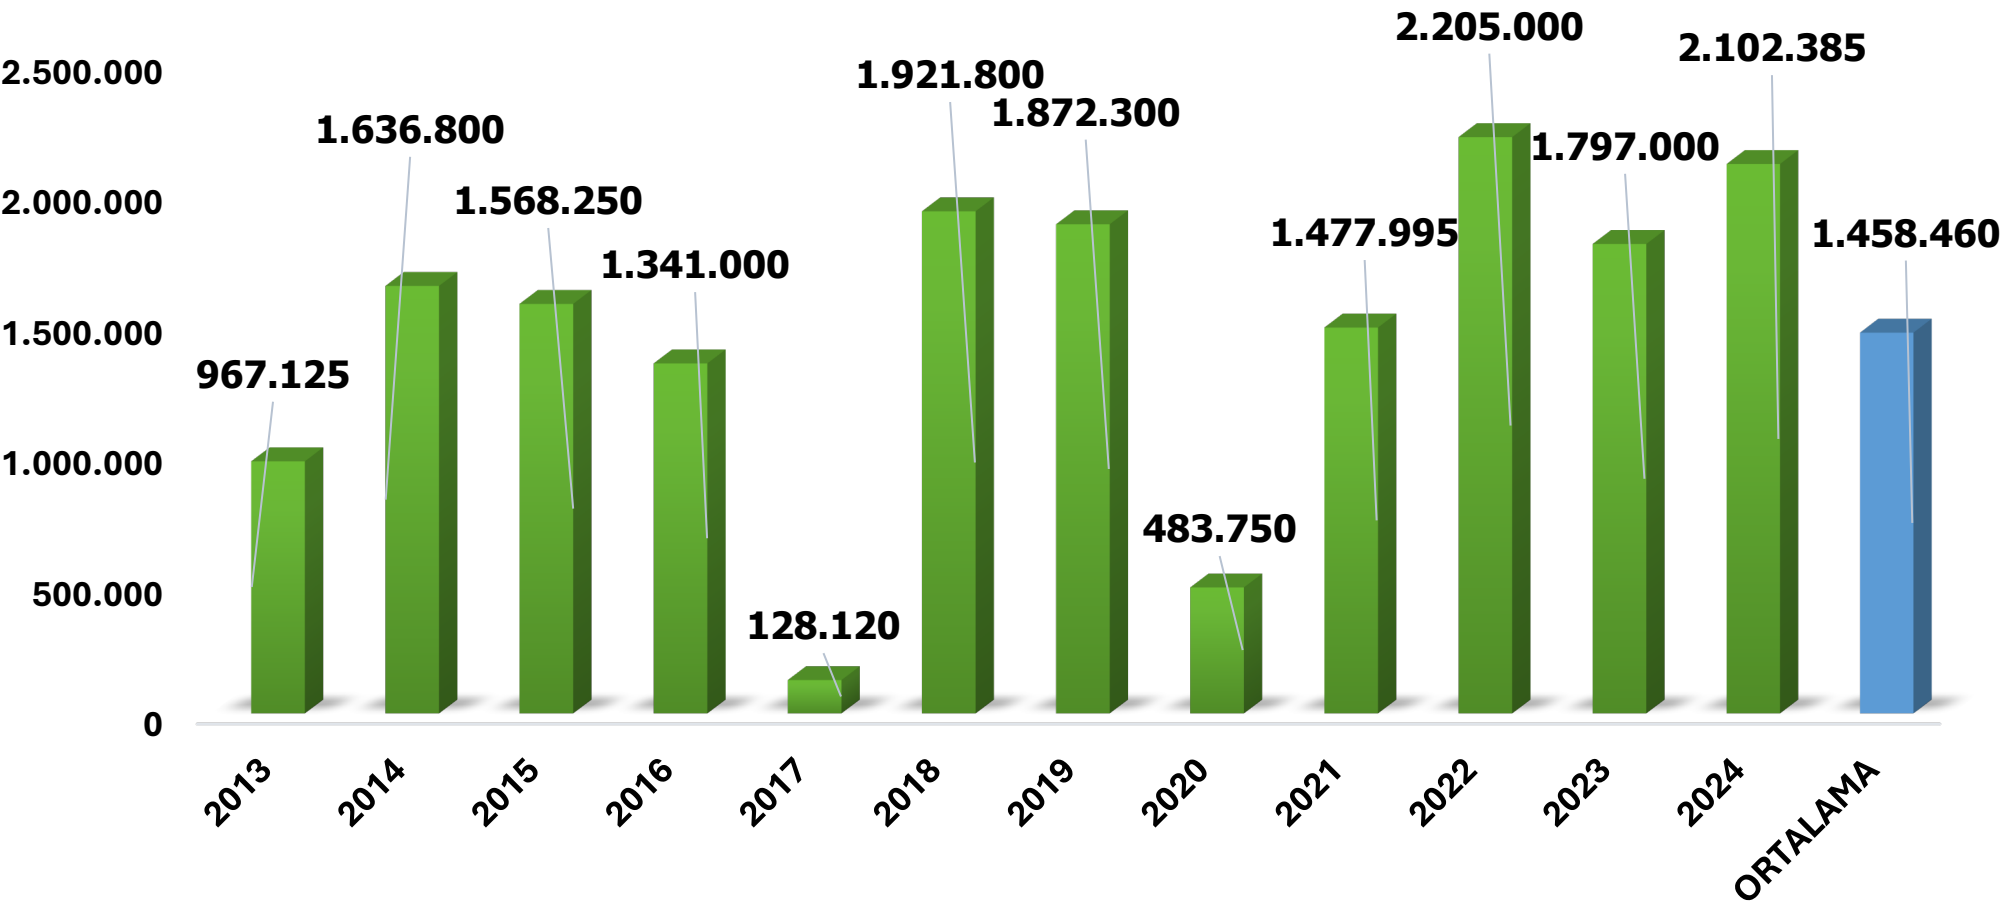

AKRA SORGUN LNG CONSUMPTION DATA

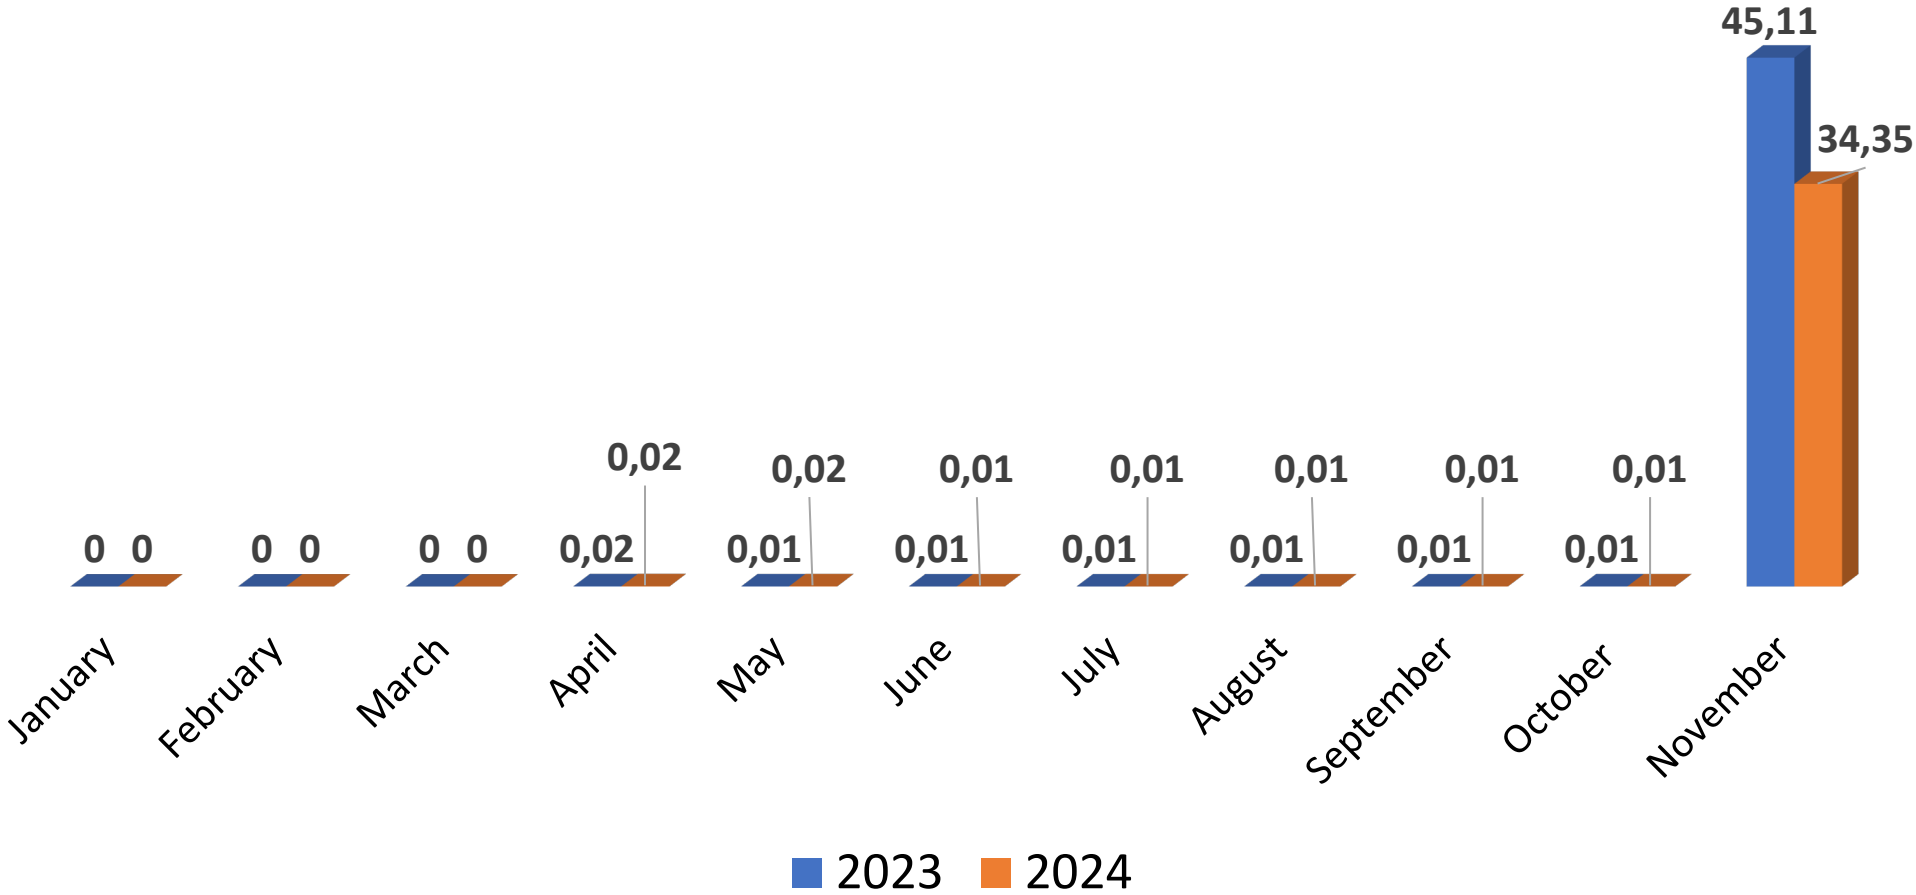

Between 2019 and 2022, LNG consumption remained lower due to a reduced number of guests during the pandemic period. Following 2022, per capita consumption decreased as a result of the energy-saving measures implemented.

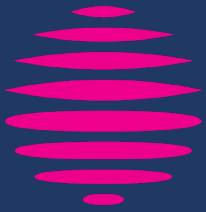

LNG Consumption by Year (Kwh)

2023 - 2024 LNG CONSUMPTION DATA PER CAPITA (kWh)

ENERGY
MANAGEMENT

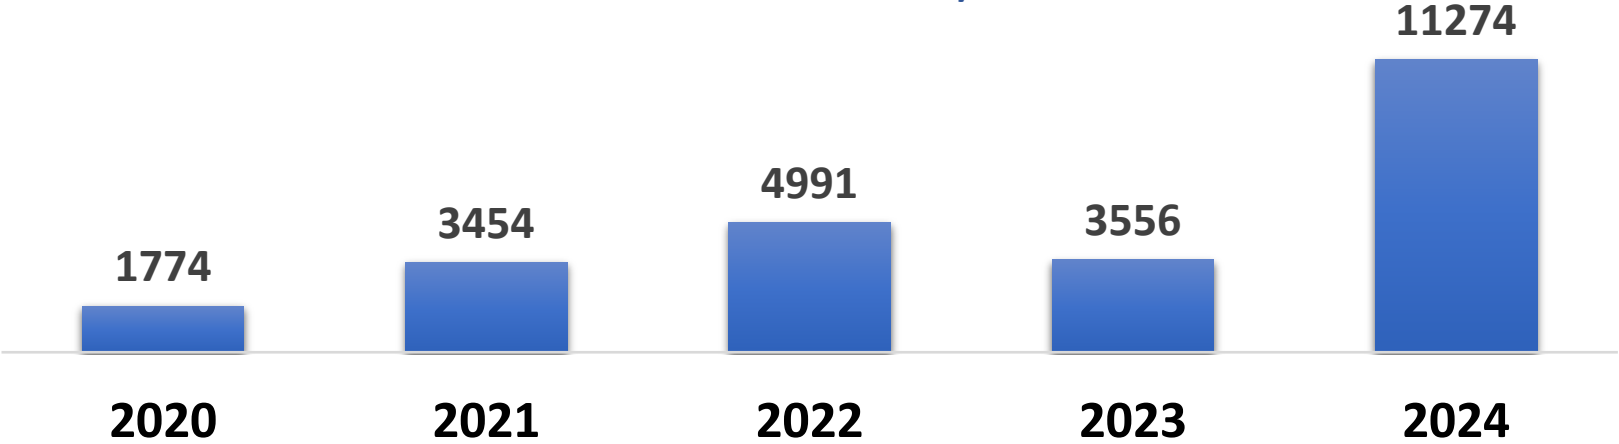

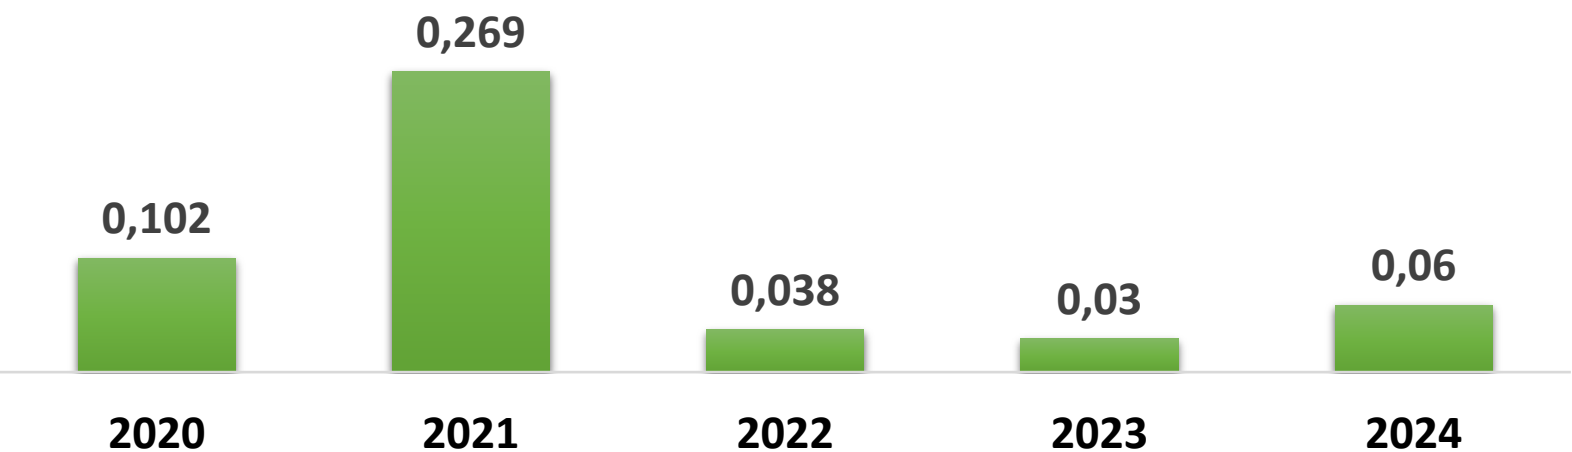

AKRA SORGUN DIESEL CONSUMPTION DATA

Not used except for power outages. However, in 2024, usage increased due to a transformer failure and frequent power interruptions.

DIESEL USE BY YEAR / LT

DIESEL / LT PER CAPITA

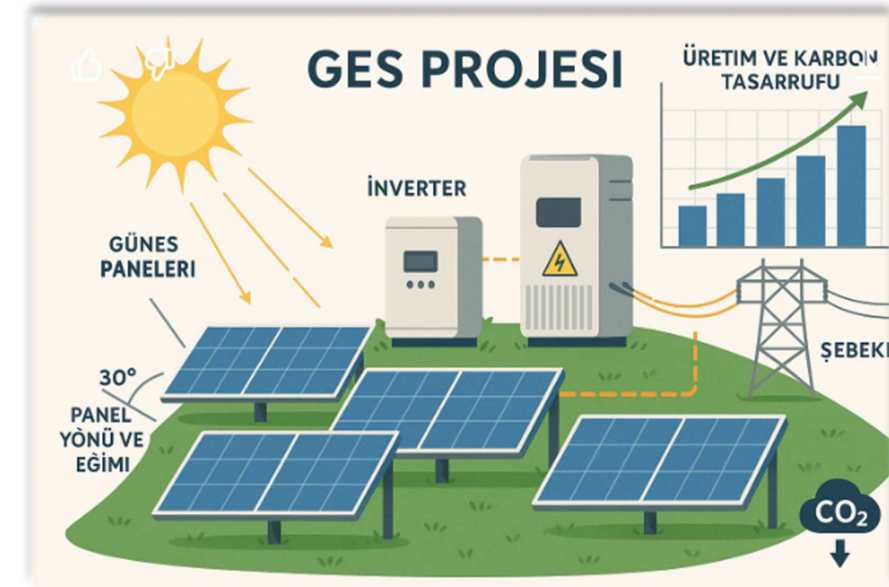

SOLAR POWER PLANT (SPP) PROJECT

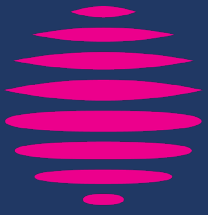

At Akra Hotels, our investment in the Solar Power Plant (SPP) project reflects not only our commitment to environmental responsibility but also our dedication to leaving a more livable world for society and future generations. This initiative is part of a forward-looking vision that addresses the needs of both today and tomorrow.

Implementing an SPP project marks a significant step in our sustainability and energy management strategy. Solar power plants generate electricity directly from sunlight, reducing reliance on fossil fuels and minimizing environmental impact. This aligns fully with the core principles of sustainability.

Sourcing our energy from a renewable resource like solar power lowers our carbon footprint, lessens harm to the environment, and positions us as an active contributor in the fight against climate change. It also reduces dependence on external energy sources, lowers long-term energy costs, and strengthens energy supply security.

As part of these efforts, we met 65% of our electricity needs from solar power in 2024. Our goal is to increase this figure to 100% by the end of 2025.

WATER MANAGEMENT

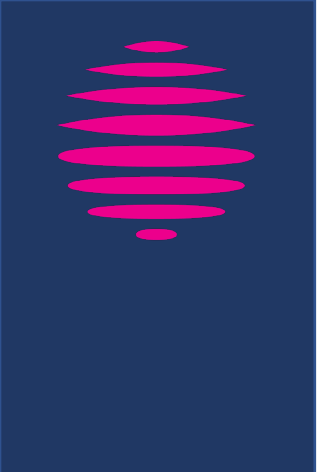

WATER MANAGEMENT

Water consumption is a significant resource usage area in our facility due to its intensive use in daily operations, swimming pools, and various living spaces. As such, the efficient use and sustainable management of water remain among our top environmental priorities.

We have implemented a range of practices to reduce overall water consumption without compromising guest satisfaction, health, or hygiene standards. These efforts include the use of water-saving equipment, awareness messages shared with guests via IPTV, and regular staff training on water conservation.

Our goal is to minimize environmental impact while contributing to the long-term preservation of vital water resources.

WATER MANAGEMENT

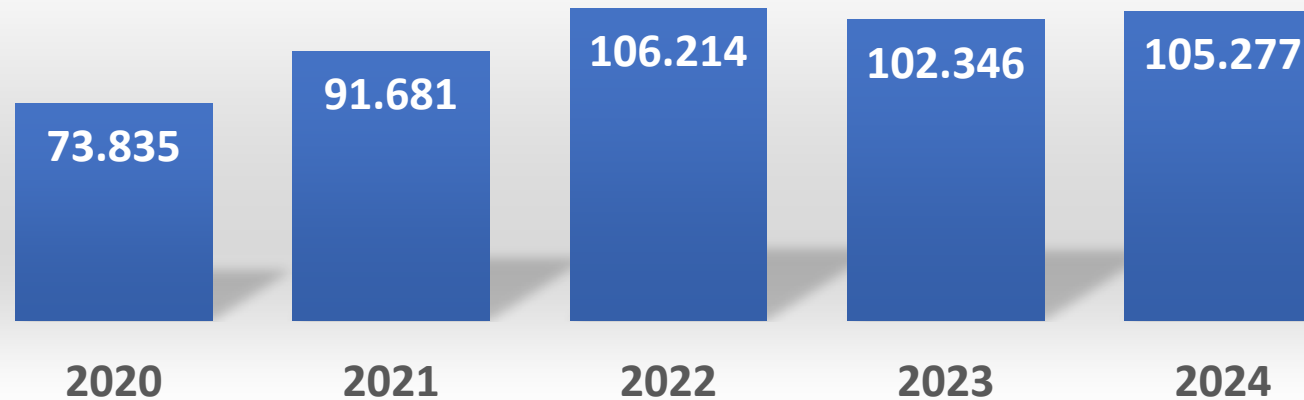

-  Towel and linen changes in the rooms are carried out based on guest requests, and guests are informed accordingly; if no request is made, towels and sheets are changed every two days.
-  Low-flow (6 L/min) special faucets with aerators are used in bathroom sinks in guest rooms.
-  Low-flow (10 L/min) special shower heads with aerators are used in all room showers
-  Toilet cisterns are designed with a dual-flush system (3 liters and 5 liters) to support water conservation.
-  Photocell-operated urinals are installed in public restrooms to reduce water usage.
-  As part of our landscaping efforts to conserve water and protect natural resources, the arid landscape area in our garden was expanded in 2024 by reducing grass coverage from approximately 30,000 m² to 20,000 m², of which 14,100 m² now consists of low water-demand grass species.
-  In line with arid landscaping practices, mulch materials such as gravel, bark, and pumice were applied around plants to prevent rapid evaporation.
-  For garden areas, low water-demand grass species were selected as part of our arid landscaping strategy due to their low maintenance needs, high water efficiency, drought and salt tolerance, resistance to foot traffic, erosion control capabilities, and their visually appealing dark green color

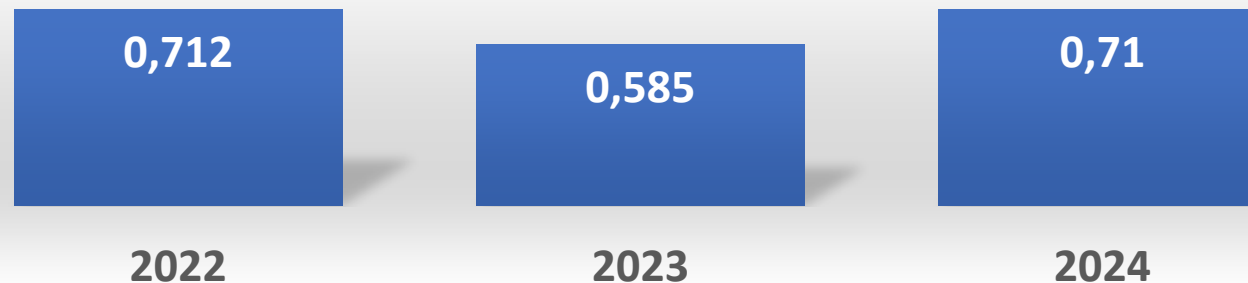

AKRA SORGUN WATER CONSUMPTION DATA

In 2022, water consumption was higher compared to the previous year due to increased occupancy levels, but began to decline from 2023 onward as a result of implemented efficiency improvements. The slight increase in 2024 is attributed to a higher number of overnight stays compared to previous years.

Water consumption by year / m3

Water m3 / per capita

2025 Gray Water Treatment System Project Planned to be Commissioned by April

To support environmental sustainability and promote more efficient use of water resources in our facility, the **Gray Water Treatment System** will become operational in April 2025. This system is designed to treat and reuse **gray water** from sources such as showers and sinks in hotel rooms.

The gray water treatment process consists of the following stages:

- Pre-Filtration:** Removal of hair, soap residue, and other large particles from the water.
- Biological Treatment:** Decomposition of organic pollutants using microorganisms.
- Chemical Treatment (optional):** Elimination of undesirable characteristics such as color and odor.
- Disinfection:** Removal of microorganisms through methods such as UV light or chlorination.

- ◆ **Full Production Capacity:** 100 m³ / day
- ◆ **Usage Area:** Garden and general area irrigation

Benefits of the System:

- ✓ Water Conservation
- ✓ Environmentally Friendly Practices
- ✓ Economic Efficiency
- ✓ Support for Sustainability Goals
- ✓ Contribution to Urban Water Management

In short, our gray water treatment system is a concrete reflection of our vision for a sustainable lifestyle—one that is both environmentally friendly and economically beneficial.

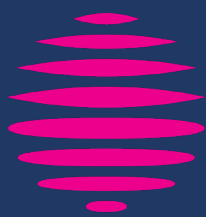

SUSTAINABILITY IN THE GARDEN

ARID LANDSCAPING

- To protect water resources and support environmental sustainability, arid landscaping areas in our garden were significantly expanded in 2024 as part of a water-efficient landscaping strategy. As a result, the total grass area was reduced from approximately 30,000 m² to 20,000 m², with 14,100 m² planted using drought-tolerant grass species.
- In line with arid landscaping practices, mulch materials such as pebbles, bark, and pumice stone were applied around plant bases to reduce evaporation and prevent weed growth.
- The selected grass species not only require less water but also offer low maintenance, high drought and salt resistance, durability against foot traffic, effective erosion control, and an appealing dark green color.

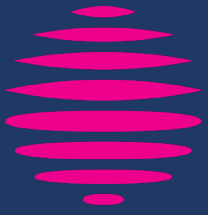

SUSTAINABILITY PRACTICES

SUSTAINABILITY PRACTICES

- Emails and documents are not printed unless absolutely necessary.
- Double-sided printing is utilized whenever possible on compatible printers to reduce paper use.
- Facility malfunctions are reported electronically to the relevant departments through an internal system.
- Office paper waste is disposed of in recycling bins rather than regular trash.
- To reduce paper and cartridge consumption, eco-friendly printers have been adopted.
- Guest identity documents (passports or national ID cards) are digitally recorded via ID/passport scanners at reception, eliminating the need for photocopies.
- Facility activity announcements are made electronically through interactive TV systems.
- Employee payrolls are delivered via email to minimize paper usage.
- R404A gas, a less harmful alternative to CFCs, is used in industrial cold rooms to protect the ozone layer.
- Concentrated chemicals are used to minimize both chemical consumption and contaminated packaging waste.
- Automatic dosing systems in pools ensure proper hygiene while using the minimum required amount of chemicals.

OUR SUSTAINABILITY-ORIENTED SUPPLIER APPROACH

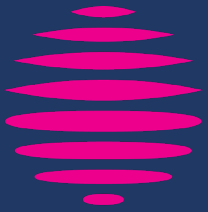

At BHM Group, the principle of Equal Social Opportunity in procurement processes ensures that all individuals—regardless of language, religion, race, sect, physical disability, or gender—are granted equal rights, opportunities, and conditions without discrimination, including in supplier evaluations involving suppliers, subcontractors, and NGOs.

SUPPLIER MANAGEMENT

Aligned with our sustainability vision, we manage procurement processes with a focus on supporting the local economy and taking environmental and social impacts into account. Through our commitment to local and responsible sourcing, we contribute to regional economic development and promote social well-being by partnering with producers and suppliers in the areas where we operate.

In 2024, 390 of our 417 approved suppliers were based in Antalya. This means that **93.53%** of our suppliers are local companies.

SUPPLIER MANAGEMENT

When selecting materials, we consider the environmental impact and energy efficiency of fuels, chemicals, pesticides, fossil fuel-powered vehicles and equipment, electrical appliances, refrigerant-containing devices, noise-generating tools, consumables, plastic products, and construction materials. Our Preferred Product Criteria in Procurement is:

- Made from recycled materials or recyclable
- Sustainably produced or sourced from sustainable origins
- Certified (e.g., Fair Trade, Organic, FSC, MSC)
- Delivered with reduced or minimal packaging
- Designed to save energy and water
- Environmentally sustainable throughout their lifecycle

Our principles of effective local resource use and responsible procurement are guided by a commitment to meeting today's needs while safeguarding the rights of future generations. Accordingly, we strive to uphold our sustainability values and create meaningful impact at every stage of our supply chain.

Global Mission, Universal Responsibility

As an internationally operating hotel company, we recognize the importance of engaging with people from diverse nations and cultures, inspiring them, and involving them in our sustainability-focused initiatives. We are committed to contributing to universal values and developing exemplary practices that draw strength from diversity and serve as a model for the global community.

WHITE WAGTAIL

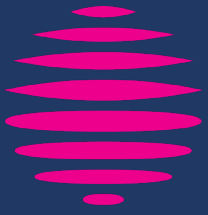

The white wagtail (*Motacilla alba*), also known as the “shaking bird” or “arzidil,” is easily recognized by its elegant black, white, and gray plumage. It derives its name from the distinctive tail-wagging motion it displays almost constantly. Commonly found along waterbanks, fields, and open areas, the white wagtail is both agile in flight and graceful on the ground. It feeds primarily on insects and is often seen walking with a characteristic rhythm.

MEDITERRANEAN MONK SEAL

The Mediterranean monk seal (*Monachus monachus*) is one of the rarest seal species in the world and is currently threatened with extinction. It inhabits the Mediterranean and Aegean coasts of Türkiye, particularly favoring caves and rocky shorelines. These seals are typically seen alone or in small groups and prefer quiet, undisturbed areas away from human activity. Although they can live both on land and in the sea, females give birth in caves to protect their young. This charming marine mammal demonstrates remarkable adaptability between environments. A large cetacean, the Mediterranean monk seal measures between 2 to 3 meters in length and weighs between 200 to 300 kilograms.

EXOCOETUS VOLITANS

Exocoetus volitans (*Hirundichthys rondeletii*) is a fascinating fish species found in the Mediterranean Sea, known for its ability to glide above the water's surface for short distances—appearing to “fly.” This unique ability is made possible by its long, wing-like pectoral fins, which allow it to leap from the water and travel several meters through the air. It primarily uses this gliding skill to evade predators. With its slender, graceful form, Exocoetus volitans thrives in warm and temperate marine environments.

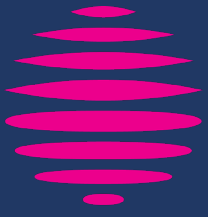

NATURAL LIFE

HEDGEHOG

Hedgehogs are small mammals known for the spines on their backs, which they use as a defense mechanism by curling into a ball when threatened. They are nocturnal creatures that feed on insects, worms, fruits, and various plants. Commonly found across many regions of Türkiye, hedgehogs prefer gardens, parks, and forested areas. Beyond their charming appearance, they play a beneficial role in nature by helping control harmful insect populations. They make their homes in soil tunnels, rock crevices, and other humid environments, thriving in spaces ranging from bushes to urban green areas. While they can be found throughout Türkiye, hedgehogs enter hibernation when temperatures drop below 4°C. Antalya, with its consistently warm climate, is one of the few places where they can be seen year-round. On average, a hedgehog can live up to 18 years.

COMPASSION FOR STRAY ANIMALS

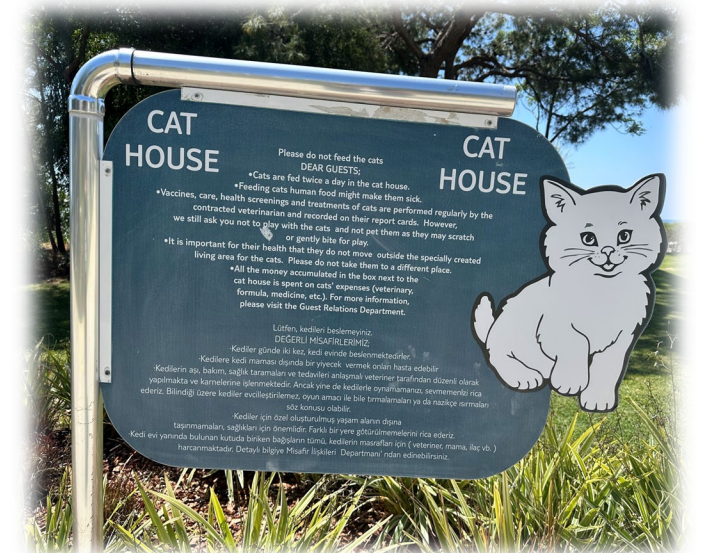

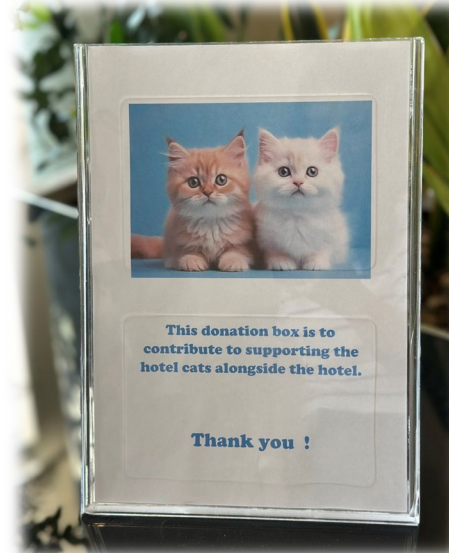

Our Four-Pawed Friends Are Part of the Family

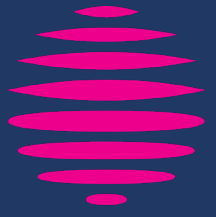

A specially designed **cat house** is located within the natural habitat of our facility to provide a safe and comfortable space for our feline friends. This area is carefully maintained to ensure they live in a secure, peaceful, and healthy environment.

All care and vaccination procedures are carried out regularly by our contracted veterinarian, with each cat's health information recorded in individual care notebooks.

Food and water bowls placed at three designated locations throughout the facility are checked daily to meet their nutritional needs. To protect their well-being, guests are kindly guided through informational signs not to feed the cats anything other than approved food.

With the voluntary support of our guests, this care process becomes a shared effort—making life in harmony with nature even more meaningful.

ENDEMIC PLANT SPECIES IN OUR FACILITY

OROBANCHE SIDEANA

Orobanche sideana, commonly known as the **Side Monster Weed**, is an extremely rare and endemic plant species found exclusively in the Side region of Manavgat, Antalya, Türkiye. A member of the Orobanchaceae family (*Canavarotugiller*), this plant is fully parasitic—meaning it does not photosynthesize and relies entirely on nutrients absorbed from its host plant. As part of the “Five in One” project, various conservation measures are being implemented to protect *Orobanche sideana*. These efforts aim to preserve the species and ensure its survival for future generations.

BAY LAUREL

Laurus nobilis, commonly known as **laurel** or **bay laurel**, is an aromatic evergreen plant that holds a significant place in Türkiye’s natural flora. It is widely used across culinary, medicinal, and cosmetic fields due to its versatile properties. Its leaves are dark green, glossy, aromatic, and typically measure 6–12 cm in length and 2–4 cm in width.

CHASTE TREE

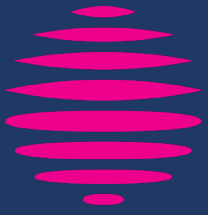

The chaste tree, scientifically known as *Vitex agnus-castus*, is a perennial shrub with medicinal properties, native to the Mediterranean and Western Asia, thriving in temperate climates. It belongs to the verbena family (Verbenaceae). In Türkiye, it grows naturally, particularly in the Mediterranean and Aegean regions. The plant typically reaches a height of 1 to 5 meters. Its leaves are divided into five to seven elliptical leaflets. Fragrant flowers bloom in the summer and come in shades of purple, blue, or white. The chaste tree prefers sunny locations and well-drained soils.

PINUS BRUTIA

Pinus brutia, also known as Turkish red pine, is one of the most widespread natural pine species in Türkiye and is well adapted to the typical conditions of the Mediterranean climate. It is particularly valued for its fire resistance and rapid growth. This species can typically reach heights of 20 to 25 meters. Its dark green, needle-shaped leaves measure 10 to 16 cm in length and are usually found in pairs. Pinus brutia plays a vital ecological role by providing services such as erosion control, carbon storage, and biodiversity conservation.

OUR FRUIT TREES

Created in line with Akra Sorgun's sustainability vision, the **Aromatic Garden** adds value to the kitchen through a nature-inspired approach. In this special area, aromatic herbs such as **mint, thyme, rosemary, basil, and lavender**—cornerstones of traditional flavors—are cultivated using entirely natural methods, bringing freshness and authenticity to local culinary practices.

NATURAL LIFE

The garden also features a variety of fruit trees including olive, natal plum, **Kayi apple, lemon, orange, tangerine, peach, apricot, pear, mulberry, white mulberry, reverse mulberry, medlar, and avocado**—all selected for their compatibility with the region's climate and their contribution to biodiversity. This rich diversity allows guests to enjoy healthy, locally sourced products. Olive oil produced from the garden's olive trees is proudly used in our cuisine.

CARETTA CARETTA

Sharing the Shore with Caretta Carettas: A Nature-Respecting Habitat

The coastline of our facility is one of the important nesting areas for **Caretta caretta** sea turtles, a species currently under threat of extinction. To protect these sensitive creatures during their breeding season, which runs from May 1 to October 1, special precautions are taken along our beach.

Our sound systems and beach lighting have been adjusted in line with turtle-friendly practices to avoid disrupting the natural life cycle of the **Caretta caretta**s.

As a result of these efforts, our facility proudly holds the “**Turtle Friendly Business**” certificate.

Guests are kindly guided by informational signs to avoid placing towels, positioning sun loungers, or digging in the sand near nesting areas. These protected zones are clearly marked with special cages and accompanying signage.

Through this collective awareness and respect, we make it possible to coexist with nature in a way that safeguards its delicate balance.

OUR BEACH GUESTS: CARETTA CARETTAS

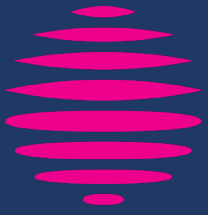

Our facility takes great pride in hosting **Caretta caretta** sea turtles, which return to our beaches each year to lay their eggs. As part of our collaboration with **DEFAKOK – the Coastal Protection Association**, we organize awareness-raising training sessions for our managers, staff, and guests, alongside educational activities focused on turtle conservation.

Thanks to these efforts, all necessary precautions are carefully implemented to ensure that hatchlings can safely reach the sea.

In 2024, our facility proudly hosted 19 nests, from which 764 baby sea turtles successfully made their way to the Mediterranean.

BIODIVERSITY
CONSERVATION

SEA DAFFODIL

🌸 Sea Daffodil: The Fragile Beauty of Our Shores

The coastline of our facility is a natural habitat for the **sea daffodil (*Pancratium maritimum*)**, one of the rarest and most endangered plant species. This bulbous and endemic member of the Amaryllidaceae family is a delicate component of the coastal dune ecosystem.

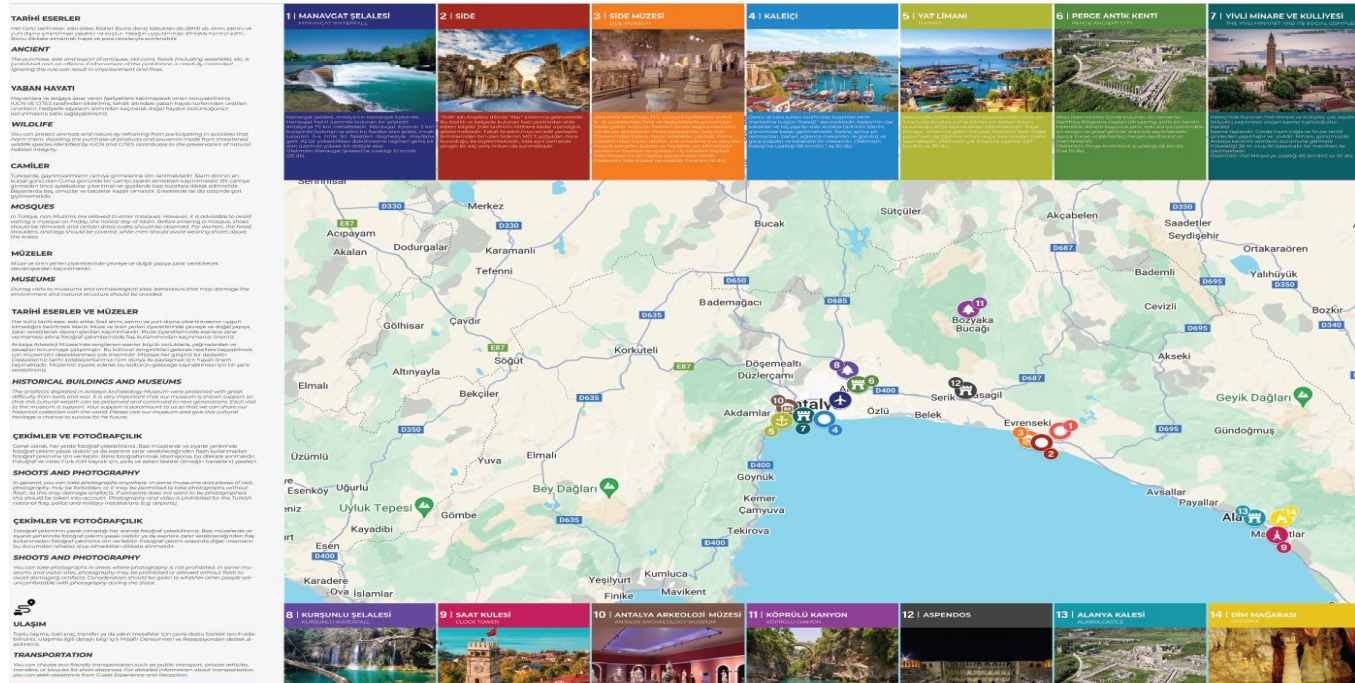

Found naturally across all Mediterranean countries and along the southern shores of the Black Sea, **the sea daffodil is legally protected in Türkiye, and its export is prohibited.**

At our facility, this unique plant continues to thrive in designated protected areas, which are clearly marked with **informational signs**. Educational and guidance activities are thoughtfully provided to help guests appreciate this elegant natural treasure without disturbing its habitat.

PRESERVING THE CULTURAL HERITAGE

PRESERVING THE CULTURAL HERITAGE

Antalya: A Journey Through Civilizations, Embraced by Nature

Antalya, a city that has hosted numerous civilizations throughout history, offers visitors a rich journey of discovery through its cultural heritage, historical charm, and stunning natural landscapes. This ancient city holds countless treasures that reveal traces of the past at every turn.

To help our valued guests explore Antalya's historical, cultural, and natural wonders, a specially prepared city map is available on the board in the hotel lobby.

By scanning the QR code on the map, you can easily access detailed digital information on trekking trails, the world-renowned Lycian Way, climbing areas, the Pisidian heritage route, and regional cycling paths.

PRESENTATION OF CULTURAL HERITAGE

PRESERVING THE CULTURAL HERITAGE

ANA TANRIÇA

Tarihte, Akdeniz çevresinde, Asya'da ve kuzey ülkelerinde birçok kültür ve uygarlıkta çeşitli isimlerle anılan bir Ana Tanrıça ile karşılaşmak mümkündür.

Anadolu'da yapılan kazılar, ana tanrıça figürünün MÖ 6500-7000'lere kadar dayandığını ortaya çıkartmıştır.

Analığı, üremeyi, dişiliği, hayatın sürmesini ve bereketi simgeleyen tanrıça, ayakta oturmuş ya da uzanmış olarak betimlenir; geniş kalçalı, iri göğüslü ve genellikle çıplaktır.

Heykellerin bir bölümünde doğum yaparken görülür. Otururken ya da doğum anındaki bazı heykellerde yanında iki leopar bulunur.

Ana tanrıçanın kutsal hayvanı olan leopar, hayvanların kraliçesi olduğunu ve doğa üzerindeki sınırsız egemenliğini simgeler.

Bazen kollarında, çeşitli efsanelere göre tanrıçanın hem çocuğu, hem de sevgilisi olan Attis' i taşır.

Kibele inancı daha sonraki uygarlıkları da büyük ölçüde etkilemiştir. Özellikle Yunan ve Roma mitolojisinde,

Frigya dönemindeki bazı tapınma ritüelleri aynı formda kültik olarak devam etmiş, Kybele' nin özellikleri farklı tanrı ve tanrıçalarda yeniden hayat bulmuştur. Bunun en bilinen örneği Yunan mitolojisindeki Artemis' tir;

Artemis Roma mitolojisinde Diana adını almıştır.

Benim heykellerimin esin kaynağı olan bu tanrıça Kibele günümüze uyarlanıp modernize edilmiştir. Heykeller pişmiş topraktır.

Divine Guardian of Anatolia's Spirit: Cybele

Cybele, renowned for her terracotta sculptures, is one of the most ancient and revered goddesses of Anatolia. Known as the "Mother of Gods," this sacred figure was venerated across Hittite, Phrygian, Hellenic, and Roman civilizations, becoming one of the most worshipped deities of antiquity.

The Cybele statues displayed in the serene garden of Akra Sorgun offer guests a powerful glimpse into Anatolia's deep-rooted spiritual traditions. Through these artifacts, visitors can explore the region's rich historical and cultural heritage and trace the enduring legacy of Cybele in Anatolian belief systems.

PRESENTATION OF CULTURAL HERITAGE

PRESERVING THE
CULTURAL HERITAGE

Our Culinary Presentations: A Celebration of Anatolian Flavors

Distinguished examples of traditional Turkish cuisine, shaped by the richness of our unique geography, are thoughtfully featured in our hotel buffet. In our menu designs, we prioritize high-quality, locally sourced ingredients, which are skillfully reinterpreted by our experienced and creative chefs—combining modern touches with a respect for traditional flavors.

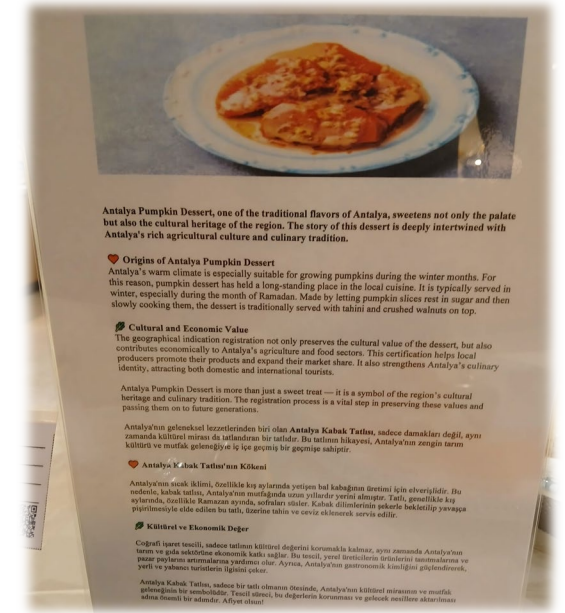

As a result, our esteemed guests enjoy an authentic yet refined gastronomic experience, where the rich tastes of Turkish cuisine come to life at a welcoming table.

PRESENTATION OF GEOGRAPHICALLY INDICATED PRODUCTS

Geographically indicated products are living symbols of the unique cultural heritage that thrives across the diverse regions of Anatolia. Promoting and presenting these products with the recognition they deserve helps showcase Türkiye's rich cultural mosaic on both national and international platforms.

With this awareness, we proudly highlight traditional flavors from the Antalya region in our buffet and share the stories behind various dishes and desserts with our esteemed guests.

PRESERVING THE
CULTURAL HERITAGE

MANAVGAT WATERFALL

Manavgat Waterfall is located on the Manavgat River in the Manavgat district of Antalya, approximately 72 km from the city center. Situated just 3 km north of the district, the waterfall takes its name from the region and is formed by river waters cascading over a 3–4 meter high cliff. Though not very tall, it flows with impressive volume across a wide area, creating a striking natural spectacle.

The waterfall is just 10 km—or a 20-minute drive—from our hotel.

SIDE – TEMPLE OF APOLLO

The name “Side” means “pomegranate” in the ancient Anatolian language. Dedicated to Apollo—the god of light, beauty, and art, and one of Side’s principal deities—this remarkable temple stands as a must-see heritage site with archaeological remains dating back to 150 AD. Built near the harbor, the Temple of Apollo symbolized the city's belief that the ancient port was under the protection of the gods. With its towering white columns and breathtaking views, especially at sunset, the temple offers an unforgettable experience of history and beauty.

OUR NATURAL, CULTURAL,
AND HISTORICAL HERITAGE

KALEİÇİ (OLD TOWN / CASTLE DISTRICT)

Located at the heart of the city and enclosed by ancient sea and land walls, the historic center is known today as “Kaleiçi.” Its narrow streets and stone buildings reflect the rich history of old Antalya, offering visitors a journey through time. Kaleiçi is also a lively destination both day and night, known for its stylish restaurants, vibrant bars, and entertainment venues. It is located approximately 80 km from our hotel, about a 1 hour and 30-minute drive.

PERGE ANCIENT CITY

Located within the borders of the Aksu district, Perge was once the capital of the ancient Pamphylia Region. During the Hellenistic period, it was regarded as one of the wealthiest and most beautiful cities in the ancient world. The city is also known as the birthplace of the renowned Greek mathematician Apollonius of Perge.

Perge is located approximately 66 km from our hotel, with a travel time of about 1 hour and 10 minutes.

OUR NATURAL, CULTURAL,
AND HISTORICAL HERITAGE

ASPENDOS

Located 2 kilometers north of the 44th kilometer of the Antalya–Alanya highway, Aspendos is renowned for having the best-preserved Roman theater—not only in Anatolia but in the entire Mediterranean world. The city was established on a hilltop plain near the Köprüçay River (ancient Eurymedon), one of the region’s largest waterways. Aspendos owed its connection to the Mediterranean and its economic prosperity to this river and the fertile lands surrounding it. Today, the most visited remains are the iconic theater and the impressive aqueducts, while other structures from the ancient city are scattered across the plain below the hill.

The distance from our hotel to Aspendos is approximately 40 km, or a 40-minute drive.

KÖPRÜLÜ CANYON

Köprülü Canyon, renowned for its breathtaking natural beauty, is one of Türkiye’s most popular destinations for rafting. Rafting here offers a fun and thrilling experience, carried out on fast-flowing rivers using inflatable boats called rafts. The canyon is located approximately 70 km from our hotel, with a travel time of about 1 hour and 10 minutes.

OUR NATURAL, CULTURAL,
AND HISTORICAL HERITAGE

SIDE MUSEUM

The Side Museum is housed in the Agora Bath, an ancient Roman bath structure dating back to the 2nd century AD, with additions and modifications made during the 5th and 6th centuries. The museum's garden features a rich collection of artifacts, including tomb inscriptions, **Seljuk-era** epigraphy, friezes, sarcophagi, column bases and shafts, mosaic fragments, **Roman** busts, and sculptures. One of the museum's most notable pieces is the **Statue of the Three Graces**, a rare and exquisite symbol of elegance and fertility.

The Side Museum is located just 7 km from our hotel, about a 10-minute drive.

ANTALYA ARCHEOLOGY MUSEUM

Located in Konyaaltı, the Antalya Archaeology Museum was founded in 1922 to protect artifacts rescued from looting during the post–World War I occupation of the region. In recognition of its cultural significance and outstanding collections, the museum was awarded the “Special Prize of the Council of Europe” in 1988.

The Antalya Museum is approximately 83 km from our hotel, with a travel time of about 1 hour and 30 minutes.

OUR NATURAL, CULTURAL,
AND HISTORICAL HERITAGE

MOSQUES

In Türkiye, non-Muslims are welcome to visit mosques. However, it is advisable to avoid visiting during Friday noon prayers, the holiest time of the week in Islam. Shoes must be removed before entering, and modest clothing is required. Women should cover their head, shoulders, and legs, while men are expected to wear trousers or shorts that extend below the knee. These guidelines help show respect for the sacred nature of the space.

OUR NATURAL, CULTURAL, AND HISTORICAL HERITAGE

MUSEUMS

Visitors are expected to maintain a quiet atmosphere during museum visits and avoid speaking loudly. Please do not touch the exhibited artifacts, and follow museum guidelines regarding photography. Food and drinks are not permitted inside, and behaviors such as running or acting disruptively should be avoided to preserve the respectful environment.

JOIN US IN SUPPORTING OUR MUSEUMS AND SAFEGUARDING HISTORY

The artifacts displayed in the Antalya Archaeology Museum have been preserved with great effort, often in the face of looting and conflict. Supporting our museum is essential to ensure these cultural treasures are passed on to future generations. Each museum visit contributes to this important mission. Your support plays a vital role in sharing our historical heritage with the world. By visiting our museums, you help us carry this rich culture into the future.

PHOTOGRAPHY AND FILMING

In general, photography is permitted in most public areas. However, in some museums and places of worship, it may be restricted or only allowed without flash to protect sensitive artifacts.

Always respect individuals' privacy—do not photograph people who do not wish to be photographed. It is strictly prohibited to take photos or videos of the Turkish national flag, police, military facilities, and sensitive areas such as airports.

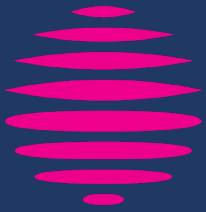

OUR NATURAL, CULTURAL, AND HISTORICAL HERITAGE

HISTORICAL ARTIFACTS

The purchase, sale, or removal of historical artifacts, including old coins, fossils (such as shells), and similar items, is strictly prohibited and considered a criminal offense in Türkiye. The enforcement of this regulation is taken very seriously and is closely monitored by authorities. Violations may result in significant penalties, including imprisonment and fines.

In case of an emergency outside the hotel, please contact Akra Sorgun at **444 40 45**, the Manavgat District Police Department at **(0242) 746 32 21**, or the Manavgat Tourism Information Office at **(0242) 753 26 57**.

OUR DONATION PARTNERSHIPS

2017

On April 23rd, we welcomed 50 children with leukemia to the ForFun Entertainment Center, ensuring they enjoyed a joyful and memorable day.

2017

On June 7th, we held an informative seminar for our hotel staff, focusing on the symptoms, causes, treatment, and prevention of leukemia, while also highlighting the importance of volunteerism.

2017

Later in the year, on Saturday, December 22nd, we hosted family representatives and volunteers at Akra for a special New Year's celebration organized in collaboration with the Foundation for Children with Leukemia (LÖSEV), aimed at lifting the spirits of children undergoing cancer treatment in the city.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

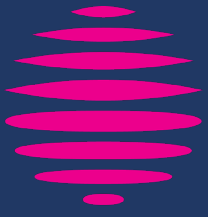

2017

On November 6th, the 37th session of our program featured guest speaker Tutku Canidar, the Antalya Provincial Coordinator of LÖSEV (The Foundation for Children with Leukemia), who delivered an insightful talk on leukemia and the journey through

2017

cancer. In collaboration with the Turkish Red Crescent, a seminar was held on June 19th to raise awareness among our staff, followed by a blood and stem cell donation drive on June 20th.

2019

On Saturday, December 28, children and their families joyfully welcomed the New Year at Akra with a heartwarming celebration.

2021

On Saturday, December 25, in collaboration with the Foundation for Children with Leukemia (LÖSEV), we hosted family representatives and volunteers at Akra and organized a New Year's party to boost the morale of children undergoing cancer treatment in the city.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

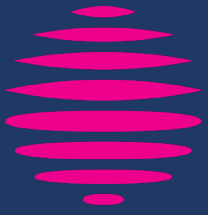

2022

For the 7th anniversary of our facility, we supported LÖSEV by purchasing handcrafted pillows made by the foundation, which were presented to our guests as special gifts during the celebration week.

The Foundation for Children with Leukemia (LÖSEV) hosted family representatives and volunteers at Akra to boost the morale of children undergoing cancer treatment in the city, organizing a joyful New Year's party. In line with this meaningful tradition, on Saturday, December 24, children once again celebrated and said "Hello to the New Year" with their families at Akra.

2018

Through our support of **KAÇUV**, we have given hope to children fighting cancer, and we are proud to nurture their dreams for the future together.

2019

We have contributed to the efforts of the **KORUNCUK Foundation**, helping ensure that children—our future’s guarantors—enjoy the right to a healthy, safe, and equal life.

2020

In this heartfelt journey of creating joy in little hearts, it has been an honor to share the same dream with the **Make-A-Wish Association**.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

2021

Being part of the inspiring initiatives of the **Spinal Cord Paralytics Association of Türkiye** holds deep meaning for us, as we work together to break down barriers and build a more inclusive world.

2022

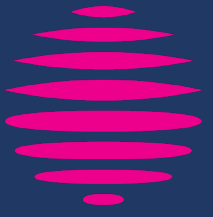

In a world where differences are a source of richness, it was a meaningful step to support **SERÇEV**’s efforts to ensure the full and equal participation of children with cerebral palsy in society.

2023

Our involvement with the **Association for Supporting Contemporary Life (ÇYDD)** and its modern, equal-opportunity education model reflects our commitment to social transformation.

2024

We remain proud to walk alongside **LÖSEV** on its journey full of life, continuing this deeply meaningful solidarity.

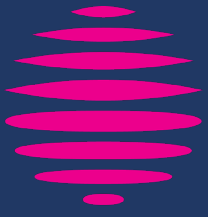

AKRA JAZZ FESTIVAL

Our facility proudly supported music and culture by hosting the 7th edition of the Akra Jazz Festival at our Akra Antalya location, helping to revive and celebrate jazz culture in the city. Held between May 24 and June 12, 2024, the festival—sponsored in transportation by Turkish Airlines—brought together world-renowned artists and enthusiastic audiences from around the globe.

Jazz Talks are held annually as part of the Akra Talks series within the scope of the Akra Jazz Festival. The event is open to the public and free of charge, welcoming all who wish to join.

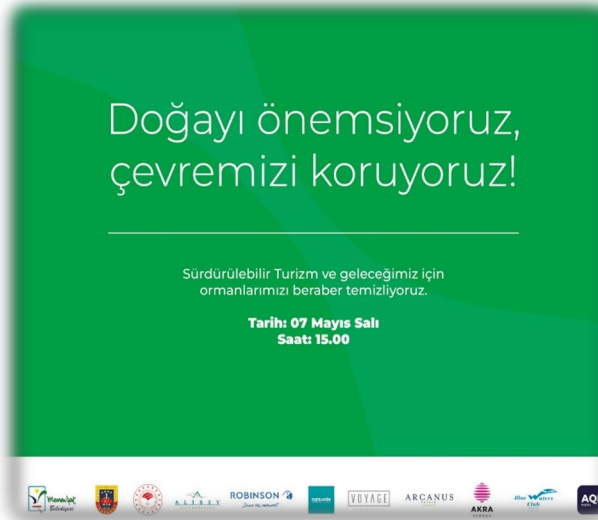

FOREST CLEANUP ACTIVITY: TOGETHER, WE PROTECT OUR ENVIRONMENT

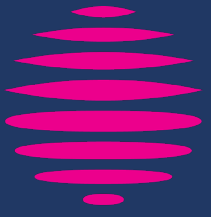

As the Akra Sorgun family, we proudly demonstrated our deep respect for nature by contributing to environmental awareness through a forest cleanup event organized in collaboration with the Manavgat Municipality, the Gendarmerie, and neighboring hotels.

As part of this meaningful initiative, we carefully cleaned local forest areas to help preserve the unique natural beauty around us and to leave a cleaner, healthier environment for future generations.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

We remain committed to our efforts, firmly believing that every step we take toward a sustainable future contributes to the protection of natural life and the growth of environmental awareness in our community.

COASTAL CLEAN-UP ACTIVITY: THE COAST IS HOME TO ALL OF US

At Akra Sorgun, we joined forces with DEKAFOK – the Coastal Protection Association – to make our shores cleaner and more livable. Through this coastal cleanup, we contributed to preserving fragile habitats, supporting a healthy marine ecosystem, and sustaining biodiversity.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

It's important to remember that our coasts are not ours alone—they are home to birds, sea turtles, crabs, and countless other species.

The care we show for our shores is a true reflection of our respect for the right to life of these silent companions.

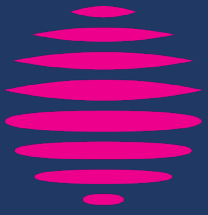

ECORDING TO NATURE

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

As part of our sustainability initiatives, Akra Hotels took a meaningful step against the climate crisis through our collaboration with eCORDING. The first seed shooting of our 5,000-seed agreement—aimed at reforestation and the protection of biodiversity—was successfully completed in Muğla between March 1 and May 5, 2024.

Through our continued partnership with eCORDING, we are breathing new life into nature and taking action to leave a greener, healthier world for future generations.

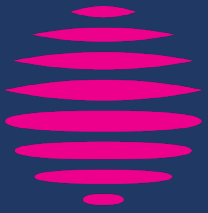

MAIN THEME: OUR FUTURE

Sustainability means meeting today's needs while preserving resources for future generations. Akra Hotels' donation to the **TEMA Foundation** supports the continuation of environmentally responsible projects and contributes significantly to the protection of natural resources and the promotion of conscious consumption habits.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

This support plays a vital role in areas such as forest conservation, biodiversity enhancement, water resource protection, and carbon footprint reduction, while also fostering the development of eco-friendly solutions and greater environmental awareness. Akra Hotels' meaningful initiative represents a strong commitment to a healthier, greener, and more balanced future. This donation reflects the brand's deep respect for both nature and humanity, underscoring its promise to safeguard not only today—but also tomorrow.

WORLD WIDE FUND FOR NATURE (WWF)

Through our support for the World Wide Fund for Nature (WWF), we contribute to the protection of nature, the survival of endangered species, and the sustainability of ecosystems. In doing so, we help raise environmental awareness and strive to leave a more livable world for future generations.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

By addressing human-driven issues such as habitat destruction, climate change, overconsumption of natural resources, pollution, and illegal hunting, we support efforts to halt the loss of biodiversity and natural habitats. Together, we work toward a future where species and ecosystems are preserved, natural resources are used sustainably, and people live in harmony with nature.

MILLION WOMEN MENTOR PROGRAM

At **Akra Hotels**, we proudly support the **Million Women Mentor Program!**

We are delighted to contribute to this meaningful initiative, helping young women pursue their career goals and empowering them on their professional journeys.

Aligned with our commitment to sustainability, equal opportunity, and social impact, we aim to inspire and stand beside the strong women leaders of the future as they step into a brighter tomorrow.

The goals of the program include:

- Encouraging the participation of young university women and recent graduates in mentoring programs
- Raising awareness and fostering collaboration opportunities
- Contributing to the achievement of 1,000,000 mentoring connections.

OUR SOCIAL RESPONSIBILITIES
AND COMMUNITY
CONTRIBUTIONS

AKRA SORGUN BIKE FRIENDLY ACCOMMODATION POLICIES

Akra Sorgun is not only a holiday destination, but also a **socially responsible hotel** committed to promoting sustainability through its bike-friendly practices. As of 2024, it proudly holds the “**Bike Friendly Accommodation Facility**” certificate, supporting an eco-conscious, sustainable, and healthy lifestyle.

With a focus on **sustainable living**, the hotel minimizes the use of motor vehicles, thereby reducing its carbon footprint and contributing to nature conservation.

By promoting bike use, it raises environmental awareness in the region and encourages individuals to embrace healthier habits.

Through its safe biking areas, repair services, and route guidance, Akra Sorgun actively fosters a culture of sports and supports the development of an active lifestyle.

Detailed information on the AKRA SORGUN – Antalya Cycling Training Routes is available on the hotel's website.

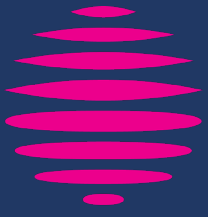

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

Akra Gran Fondo & Tour of Antalya: Pedaling Toward the Future

Guided by its vision of healthy living, a sustainable future, and social solidarity, **Akra Hotels** brings the values of sports and a good life culture to the forefront through its **Akra Gran Fondo** and **Tour of Antalya** events. These initiatives not only make sports more accessible to all, but also promote eco-friendly transportation, raise public awareness about healthy living, and contribute to the local economy. Together, they stand out as meaningful social responsibility projects—symbolizing respect for nature, a passion for sports, and the strength of collective action.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

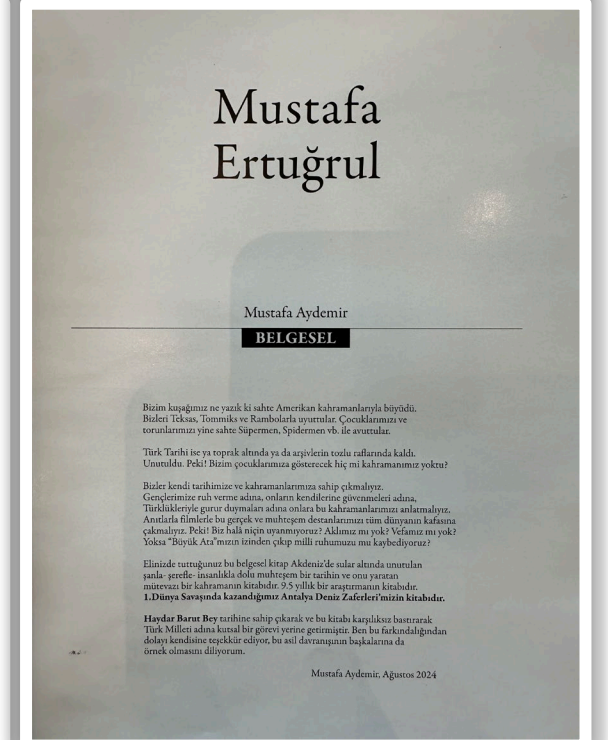

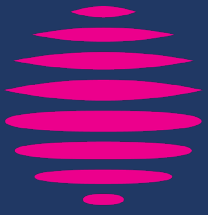

FOSTERING HISTORICAL AWARENESS TO SUSTAIN CULTURAL HERITAGE

By distributing books on Turkish history to our employees, we have taken a meaningful step toward preserving cultural heritage and passing it on to future generations. This initiative enhances social sustainability by raising historical awareness and reinforces our organization's commitment to social responsibility by keeping cultural values alive. At the same time, it supports the personal development of our employees and contributes to building a knowledge-based, sustainable society.

OUR SOCIAL RESPONSIBILITIES AND COMMUNITY CONTRIBUTIONS

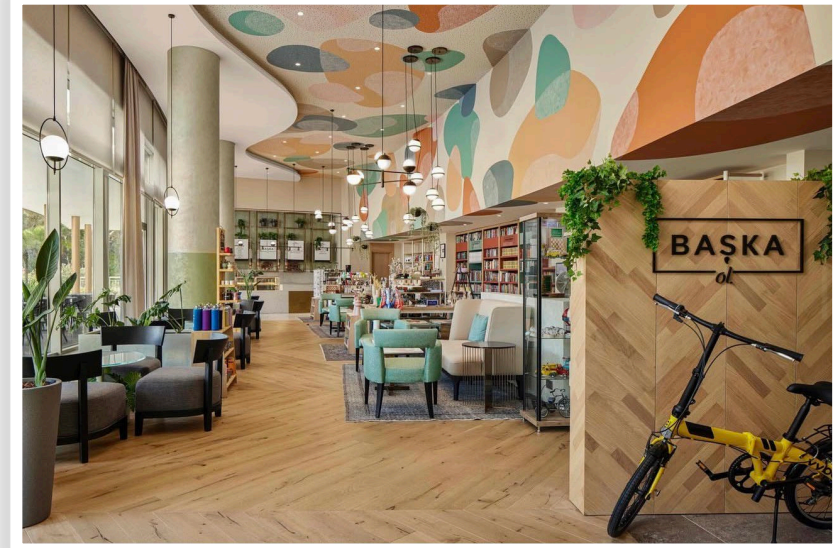

BAŞKA OL

• Book • Café

More than just a café, Başka Ol stands out with its book-filled shelves and its bicycle-friendly concept. A dedicated area has been created within the café where guests can access various bicycle-related parts, manuals, and materials that reflect and support bicycle culture.

SOCIAL INVESTMENTS

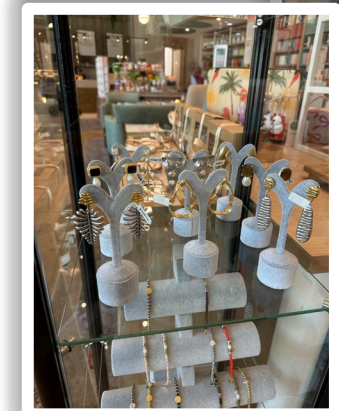

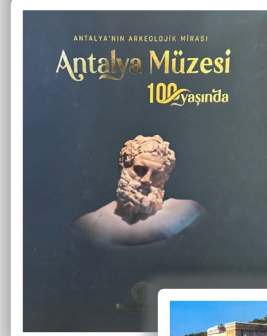

BAŞKA OL

• Book • Café

At Başka Ol Café, we prioritize women-led and local producers when selecting products for sale.

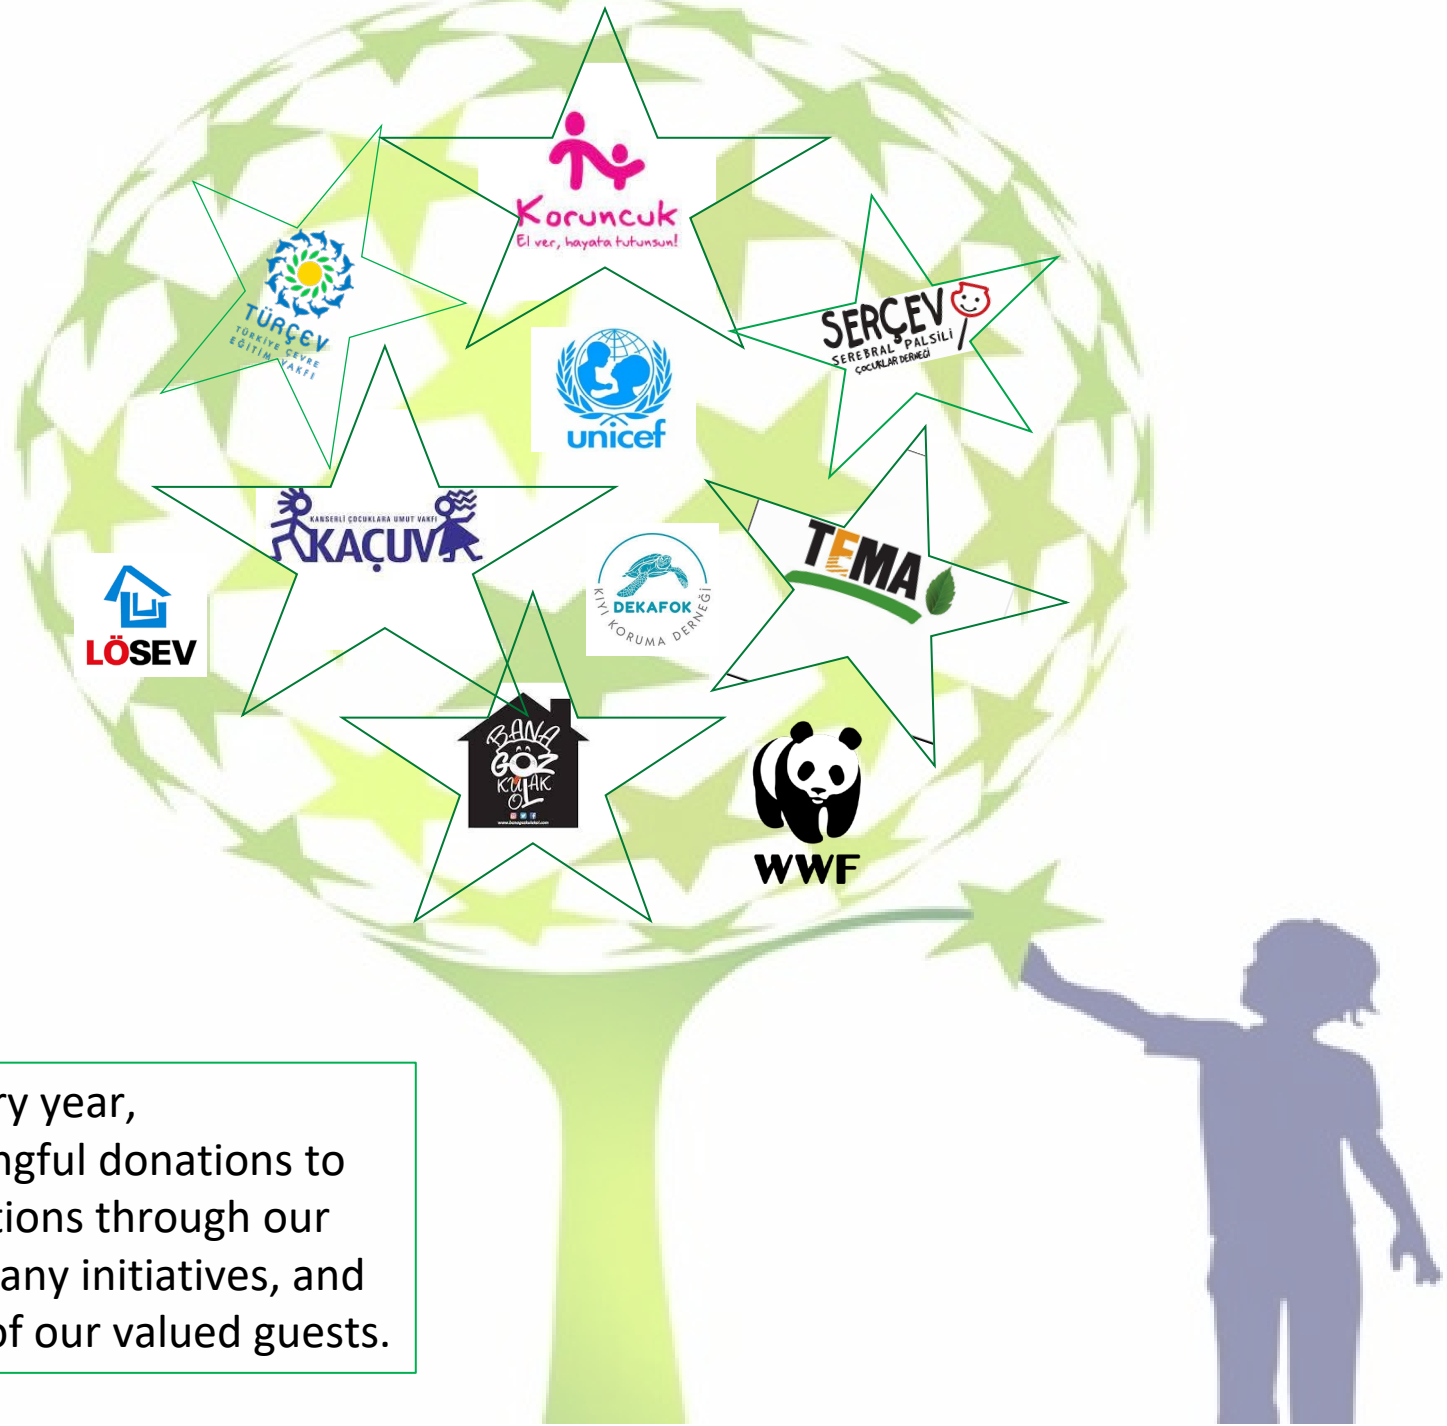

Through our specially curated **Antalya Corner**, we offer guests a selection of books that reflect the region's cultural richness. This initiative not only promotes and preserves local heritage but also adds meaningful cultural value to the guest experience. Aligned with our sustainability approach, it supports the preservation and appreciation of natural, historical, and cultural assets for future generations. Reflecting Antalya's unique landscape, history, and diversity, the corner also helps foster greater social awareness.

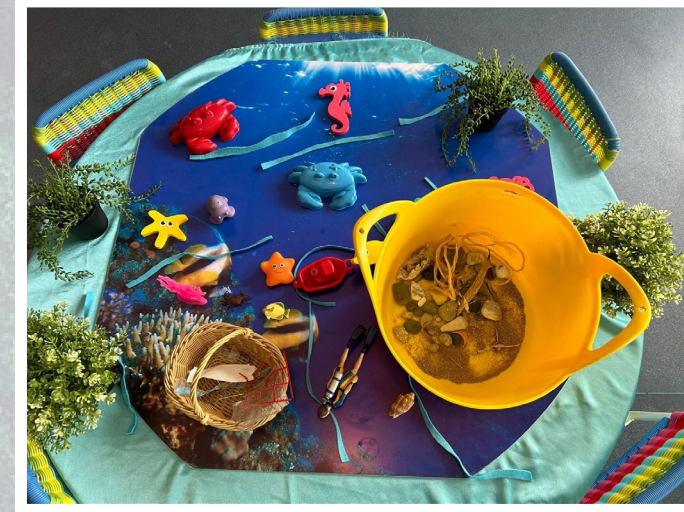

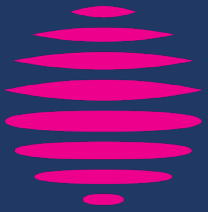

SOCIAL INVESTMENTS

DONATIONS

SOCIAL INVESTMENTS

Every year,
we make meaningful donations to
various associations through our
events, our company initiatives, and
the contributions of our valued guests.

SOCIAL INVESTMENTS

THE GREATEST LEGACY WE WILL LEAVE OUR CHILDREN: A LIVABLE WORLD

At our Kids Club, recycling-themed activities under the concept of **“Our World and Our Environment”** are organized to support the physical, mental, and social development of our young guests.

TRAINING AND PREVENTIVE ENVIRONMENTAL MEASURES AGAINST FIRE RISKS

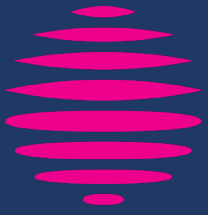

As part of our annual training programs, comprehensive fire safety training sessions and hands-on drills are regularly conducted for our valued employees.

These training activities are delivered through both internal resources and external professional support, with the aim of reinforcing fire safety awareness across all departments, under the guidance of our Occupational Health and Safety (OHS) Specialist.

In parallel, proactive environmental measures are implemented to protect the trees and natural areas within our facilities from potential fire risks. All actions are carried out with great care and in line with our commitment to sustainable environmental management.

- Fire safety training was conducted for our employees.
- Emergency response teams were established.
- Fire drills were organized to reinforce preparedness.

FIRST OF ALL, WHY HUMAN ASSETS AND NOT HUMAN RESOURCES?

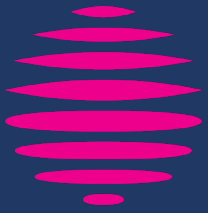

Resources deplete; value grows. While a resource is budgeted, spent, and replaced, value is something to be nurtured, appreciated, and enhanced over time.

Viewing people as assets means creating and cultivating an environment where they can realize their full potential and continuously grow on their journey to becoming the best version of themselves.

At BHM Group, we recognize that our greatest asset is our employees. With the guiding principle of “Happy Employee, Happy Guest,” we are committed to delivering value to all our stakeholders.

We prioritize key areas such as social and fringe benefits, recognition, training and career development, and employee safety—ensuring a supportive, fulfilling workplace for all.

WORK LIFE

➤ **Recruitment**

Recruitment processes at our facilities are conducted in line with the framework established by the Group Human Resources Directorate.

All hiring is carried out through a structured, multi-stage interview process that is fair, objective, non-discriminatory, and includes general aptitude evaluations.

➤ **Fair Placement and Fair Remuneration**

Minimum qualification requirements have been established for each position to ensure fairness and transparency. This approach supports fair placement, career development, and effective workforce planning, while also guiding management in recruitment and role assignment processes.

Before beginning their roles at our facilities, all employees are clearly informed about their wages, working conditions, working hours, and payment schedules.

➤ **Education and Career Management**

All employees are granted equal access to training opportunities. In addition to mandatory legal and vocational training required in the hospitality industry, employees are encouraged to participate in a wide range of programs—covering topics such as personal development, self-awareness, leadership, and foreign language skills—designed to enhance their competencies and overall personal growth.

With a strong belief in investing in people, our group places special emphasis on education and prioritizes internal promotions, whether within the facility or across the group.

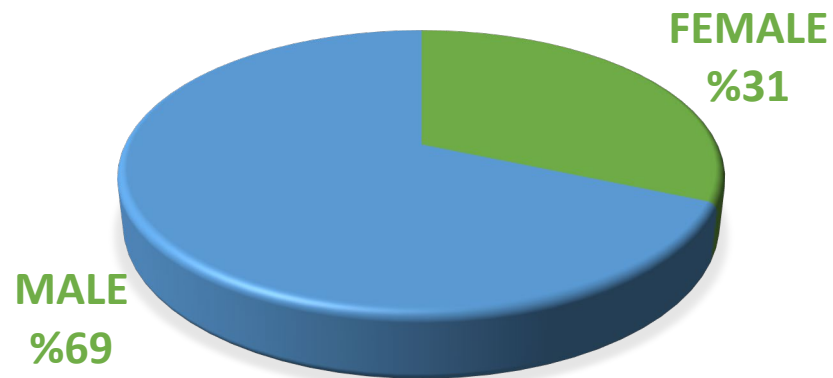

In 2024, **19** of our employees were promoted.

➤ Employee and Human Rights

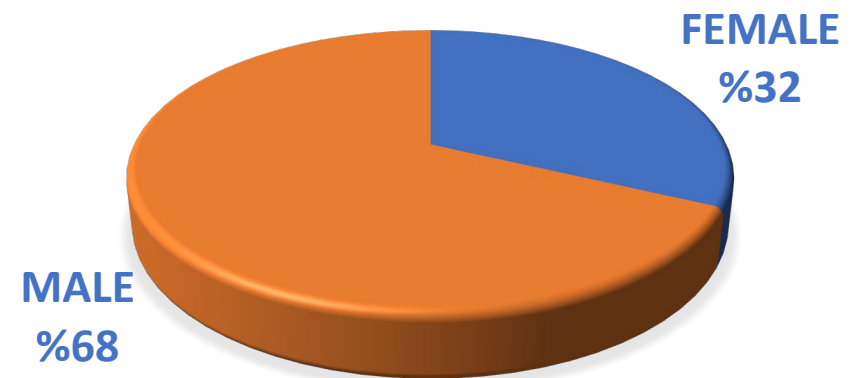

Ensuring the full satisfaction of BHM Group employees is a top priority. In this context, it is the responsibility of management to provide a supportive working environment—covering everything from workplace comfort, mental well-being, motivation, and performance, to the protection of legal rights and the provision of additional fringe benefits.

In the hospitality sector, we strive to maintain gender balance across all work environments. Guided by the principle of “equal pay for equal work,” we do not permit any disparity in remuneration between female and male employees.

2023 FEMALE - MALE EMPLOYEE RATIO

2024 FEMALE - MALE EMPLOYEE RATIO

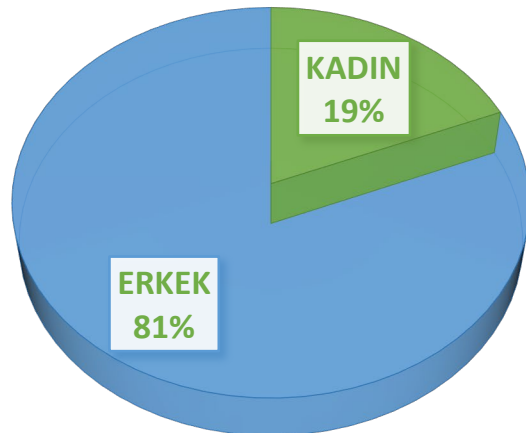

➤ Employee and Human Rights

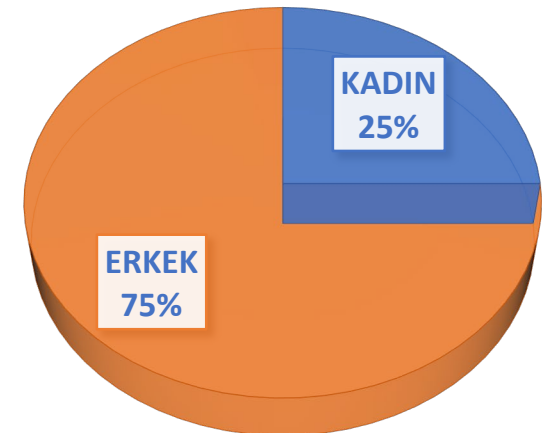

Discrimination based on nationality, race, language, or any other personal characteristic is strictly against both our hotel management policies and our core working principles. All employee matters are handled with equal care by our Human Values Directorates, in accordance with legal regulations and our corporate standards, ensuring equal opportunities for everyone within the hotel.

We recognize that work efficiency thrives in an environment where people, work, and society are treated with respect. We believe that promoting diversity and equality within the organization is essential. For this reason, we actively encourage cultural diversity and equal opportunity across all levels.

DEVELOPMENT SUPPORT

Vocational qualification certificates enable our employees to demonstrate their knowledge, skills, and competencies when applying for a job. They support career mobility by opening clearer and more accessible pathways for professional advancement.

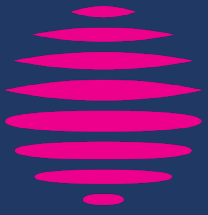

As national qualifications recognize non-formal and informal learning, individuals are empowered to pursue personal development through more diverse and flexible means.

In 2024, **20** team members benefited from our foreign language support program.

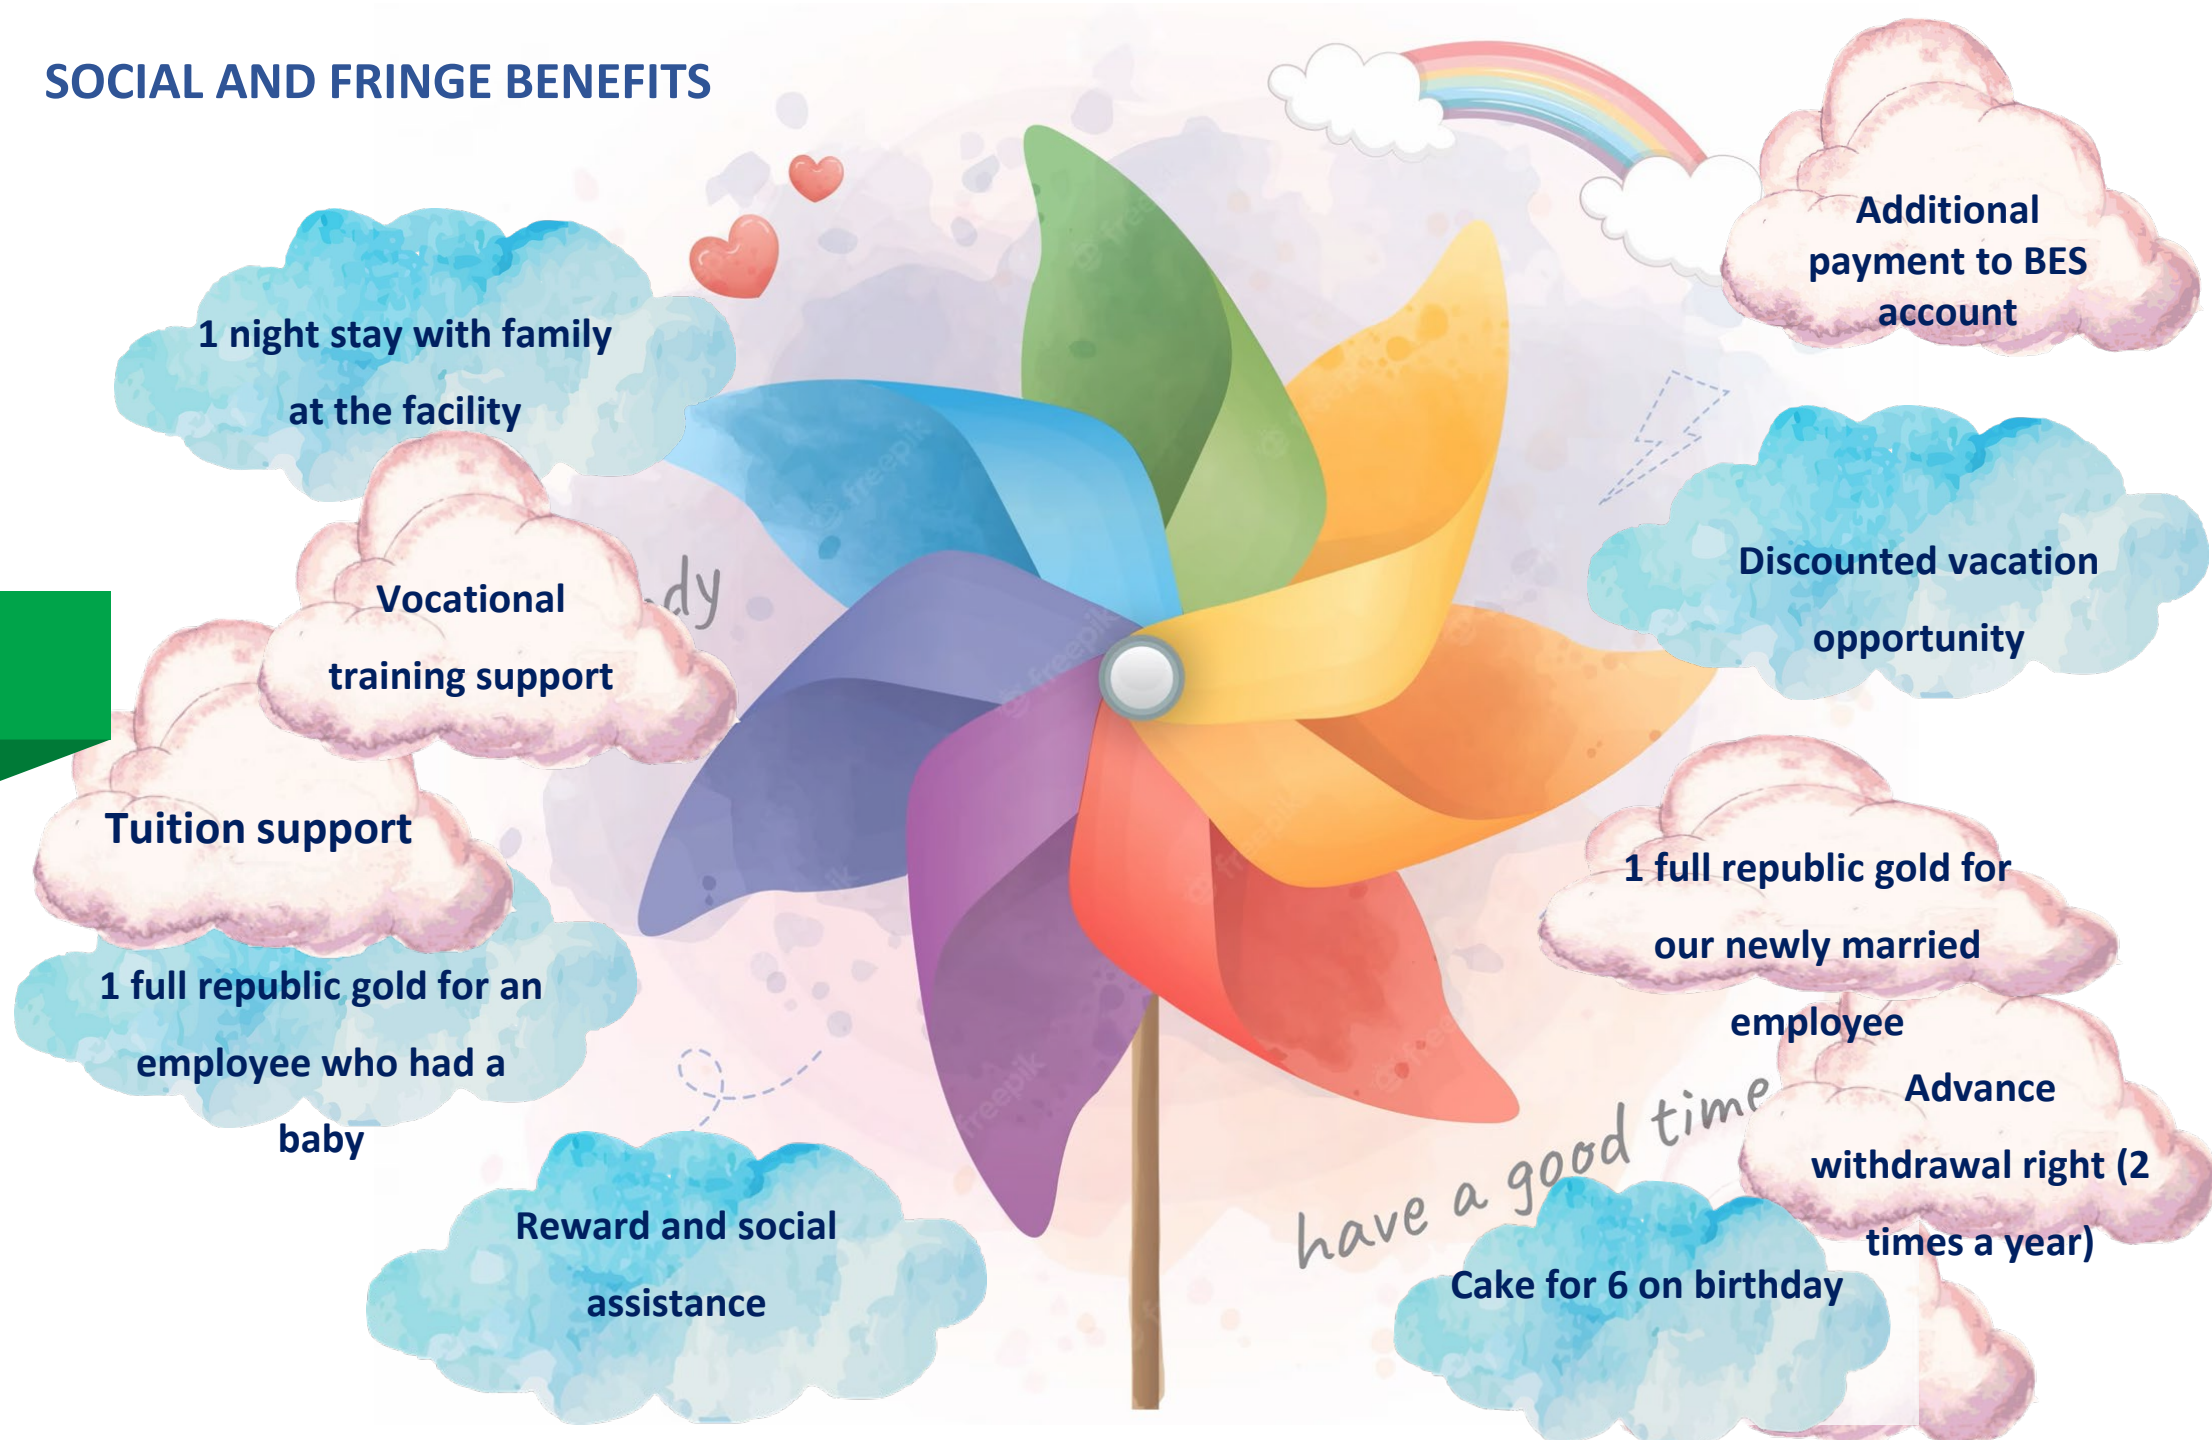

As part of our fringe benefits, one full Republican gold coin was presented to **five** employees following childbirth, educational assistance was provided to **15** employees, and **eight** employees received one full Republican gold coin in celebration of their marriage.

WORK LIFE

ACCESSIBILITY FOR ALL

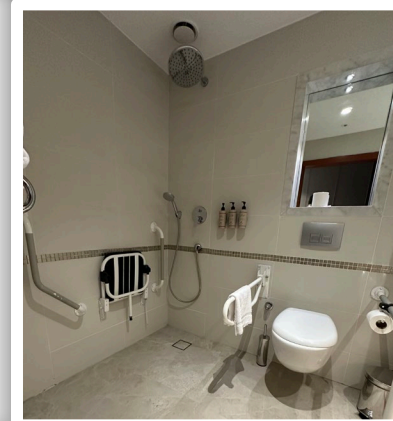

- There are more than 650 million people with disabilities worldwide. In this context, accessible (disability) tourism represents a significant and growing segment within the tourism industry. According to the World Health Organization, at least 10% of every society consists of individuals with disabilities. In Europe alone, when pregnant and elderly individuals are included, this market exceeds 50 million people. When family members and companions are considered, individuals with disabilities represent a potential tourism audience of approximately 20 million.
- Individuals with disabilities, who represent a significant portion of society, often face numerous challenges when accessing tourism services. Enhancing their participation in tourism begins with understanding their specific needs and addressing the barriers they encounter.
- At Akra Sorgun, we offer three specially designed accessible rooms—two deluxe rooms (for four guests) and one family room—as well as features such as elevators suitable for wheelchair use, accessible restrooms in common areas, a ramp and elevator at the family pool, stair access to the adult pool, and four reserved sun loungers along with floating loungers on the beach for guests with disabilities.
- Accessible guest rooms are equipped with sound and light emergency sensors; vibrating pillows for added safety and comfort.

WEWALK - CONSULT APP

WeWALK is an innovative mobility platform designed to help visually impaired individuals navigate independently and safely. By leveraging the latest technology, it offers solutions that promote equal and full participation of visually impaired people in all aspects of social life.

CONSULT: WeWALK is a feature within the mobile application that connects visually impaired users with professional assistants, providing real-time visual guidance through the phone's camera in any situation where visual support is needed.

- Escorting visually impaired guests to their rooms
- Providing in-room orientation, including use of the wardrobe, minibar contents, power sockets, amenity kits, bathroom facilities, air conditioning settings, and remote control
- Ensuring accessibility of printed materials such as menus and information cards
- Assisting with navigation to social areas within the hotel (e.g., restaurant, gym, beach, meeting rooms) and providing detailed information about available refreshments, materials, and equipment in these spaces

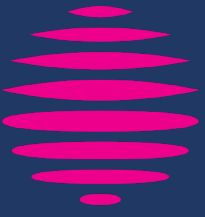

In 2024, Akra Hotels was honored with the **Barrier-Free Informatics Private Sector Award** for its innovative WeWALK project.

OUR ROADMAP FOR A SUSTAINABLE FUTURE

- To make our waste management processes more sustainable by planning various actions aimed at reducing single-use plastic waste in our facility.
- To continue providing training and awareness activities on environmental and sustainability issues to increase the environmental awareness of our employees and stakeholders.
- To continue using environmentally friendly products in amenity materials.
- To continue meeting our energy needs entirely from 100% renewable energy sources.
- To continue protecting **Caretta Caretta** turtles and sand lilies within the scope of biodiversity conservation, to raise awareness through informative panels, and to support awareness for the protection of wildlife. To implement the necessary measures to ensure the protection of Caretta Carettas and their breeding areas, and to maintain our cooperation with **DEKAFOK** in this regard.
- To continue preferring eco-friendly and energy-efficient technologies and high-performance equipment in order to preserve the energy of the future starting from today.
- To develop projects that aim for the efficient use of natural resources within the scope of our sustainability efforts.
- To continue prioritizing local business partners in our procurement processes to support economic development and reduce environmental impacts.
